Auto-Set® H200 Series

The automatic closing H200 Series horizontal shutters prevent the migration of heat, smoke or hot/toxic gasses by creating vertical compartments thereby separating the vertical spaces from one another.

Horizontal shutters reduce construction costs. Smoke evacuation systems can become unnecessary and one horizontal fire shutter can be used in lieu of numerous conventional fire barriers on multiple floors.

Model	Open	Self-Close	Egress	Function
H200	Auto-Set® Power Operator	Fail-Safe Mechanical	N/A	Coiling on the Horizontal Plane
H250 (Curved)	Auto-Set® Power Operator	Fail-Safe Mechanical	N/A	Coiling on the Horizontal and Vertical Plane

Ratings

2-hour rated UL 10B
Smoke & Draft labeled UL 1784

Finishes

McKeon Sterling Gray
Powder coat
Stainless steel

Benefits

- Robust and durable construction that can be operated numerous times daily
- Creates compartmentation and allows designs to NOT need to meet the atrium provisions in the BCA
- Can take debris impact and direct water on the barrier
- No need to customise sprinkler designs to accommodate the horizontal barrier
- Secure when closed

Operation

Auto-Set® automatic resetting
Fail-Safe Design - automatic self-closing mechanism does not require power operation
