WATER TANKS

...LEADERS IN SUPER SLIM LINE WATER TANKS

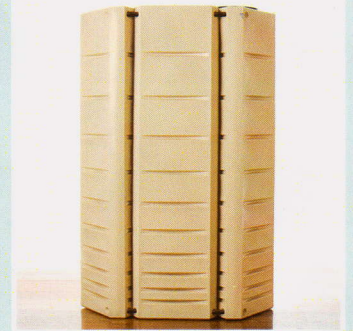

Super Slim Line Modular Tri Tank

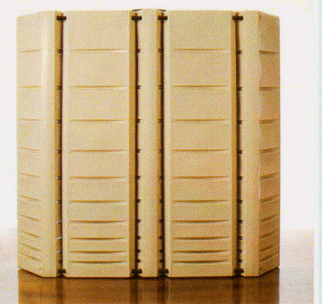

Next Generation are pioneers in architectural super slim line water tanks. Our unique modular tri tank design maximizes the use of tight spaces by utilising a minimum 'footprint' to hold the largest capacity of water. The modular tri tanks are ideal for narrow passages or any area which cannot be accessed except through the building itself. Eg to access rear courtyards, etc.

(H) 2070 x (W) 573 x (D) 500mm
Capacity 360L

3 Tanks = Capacity 1080L

5 Tanks = Capacity 1800L
