

The Cyclo 2-up Vertical Stand Double-sided is an efficient solution for safe and secure bicycle parking ideal for public areas where floor space is limited

The bike rack features two racks on either side of a post, which use single rubber-coated pins, allowing two bikes to hang freely by the front wheels without damage. This is a more convenient solution than a cradle design which can interfere with the wheel mudguards.

The product conforms to AS2980.3-2015 Class B & C. The rack comes flat packed with the pole separate for on-site bolt together assemble.

Available in a range of high grade finishes, the 2-up Vertical Stand Double is the ideal solution for end-of trip-facilities and basements.

Product features

- Capacity to park 4 bikes (2 per side)
- Conforms to AS2890.3-2015 Class B & C security
- Heavy duty construction
- Anti-theft shear nuts
- Plastic sleeve on hanging pins for wheel protection
- No damage to tyre mudguards and spokes
- Stand-alone floor mounted bolt base
- Unique registered design (IP protected)
