louvretec retractable roofs

Introducing the Louvretec Retractable Roof.

This innovative stacking or retractable system uses new technology designed, developed and extensively tested by Advanced Design Innovations (ADI) in Australia.

Now, in joint collaboration with ADI, Louvretec is pleased to announce that this next generation Retractable Roof is now available exclusively through the Australian & NZ Louvretec Dealer network.

Featuring all the attributes of conventional Opening Roofs, the Louvretec Retractable has the added advantage that at the touch of a button it rotates to 90 degrees and retracts away, leaving clear open spaces above.

Uninterrupted sun in winter...

The stars above on a summers evening...

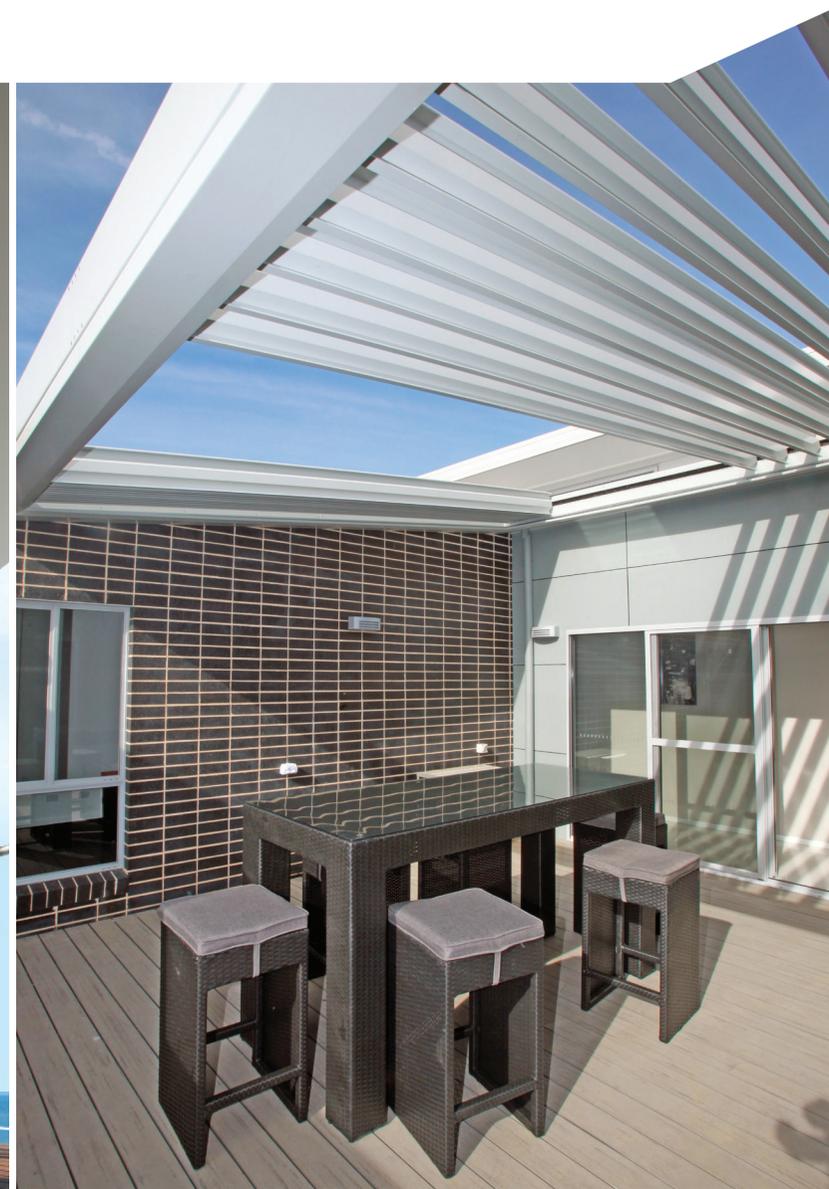

Wide open views anytime you want...

Shade and a cool breeze in summer...

Covered protection from wind and stormy weather...

Spoilt for choice – perfect!

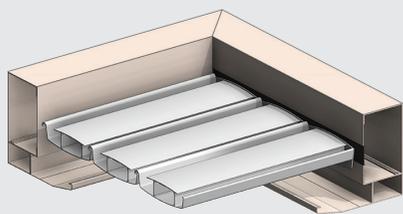

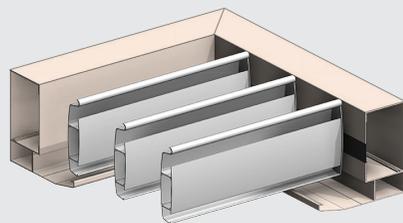

retractable roofs – a new idea opening up

LOUVRETEC RETRACTABLE ROOF

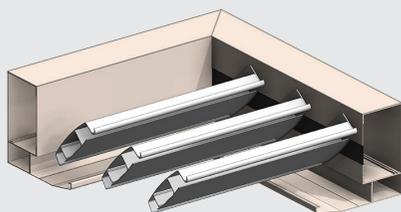

HOW IT WORKS

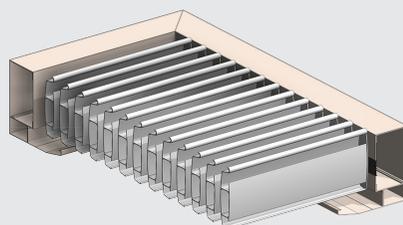

ROOF CLOSED

ROTATES TO 90 DEGREES TO RETRACT

ROOF OPERATES TO 135 DEGREES OPEN

RETRACTS LEAVING OVER 70% OPEN SPACE

SPANS AT A GLANCE

MAXIMUM SPANS

OPERABLE
RETRACTABLE ROOF

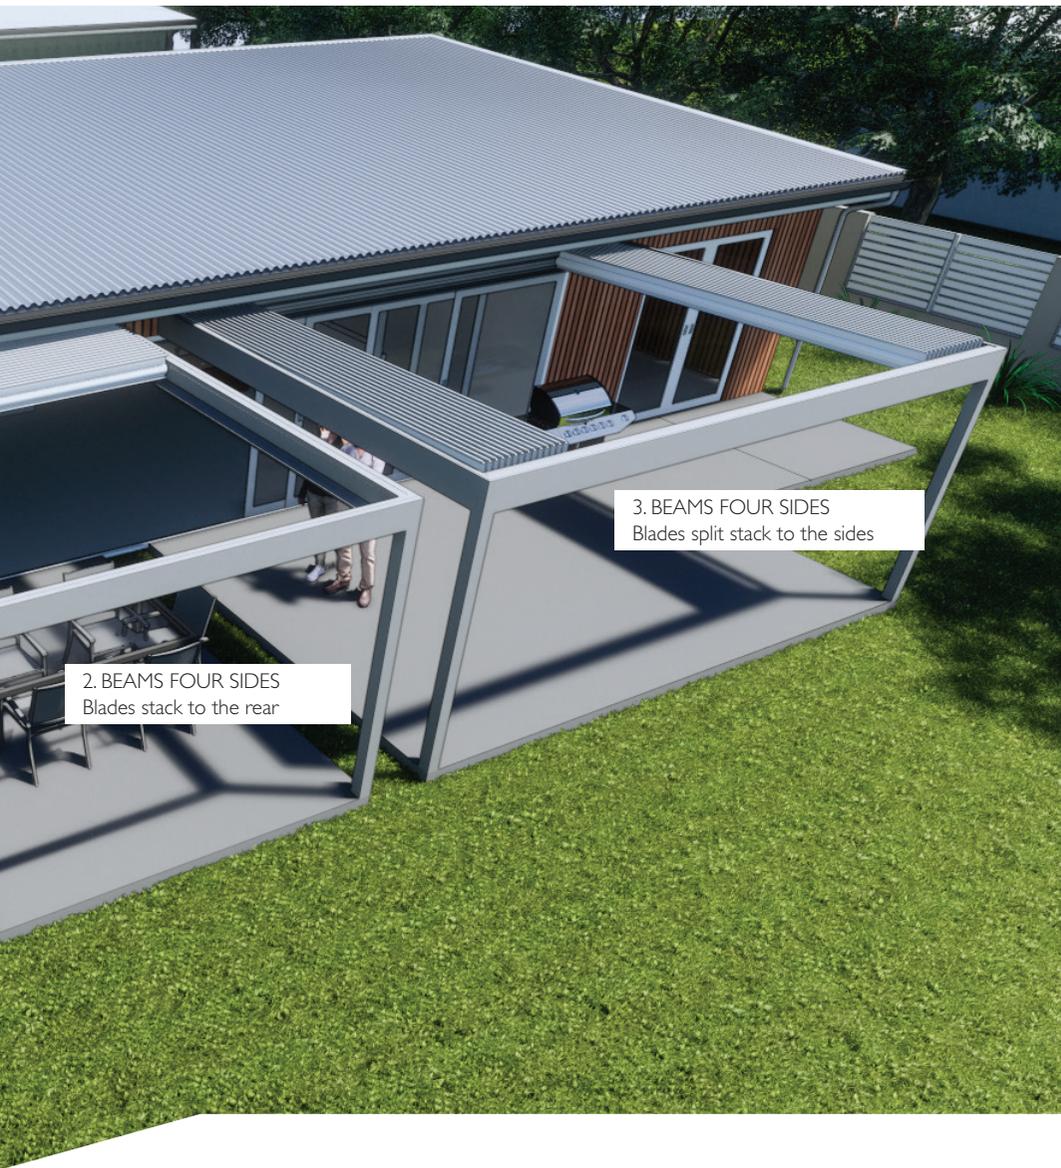

RETRACTABLE ROOF

FOUR CONFIGURATIONS

1. NO FRONT BEAM
Blades stack to the rear

2. BEAMS FOUR SIDES
Blades stack to the rear

3. BEAMS FOUR SIDES
Blades split stack to the sides

VERSATILE DESIGN

The Louvretec Retractable roof converts a two dimensional opening roof into a three dimensional retractable system.

This gives extra design and creative options when planning your outdoor spaces...time to think beyond the square.

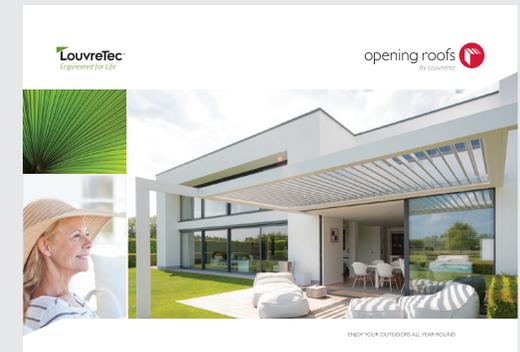

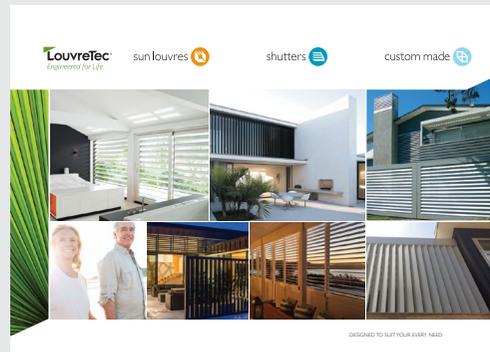

4. BLADES CLEAR OPENING
Completely open space over
