CONSISTENT AND RELIABLE COMMUNICATION

It's annoying when you can't speak to the same person each time you contact a supplier.

We dislike this as much as you do. At EDGE Architectural we take pride in offering superior service with consistency.

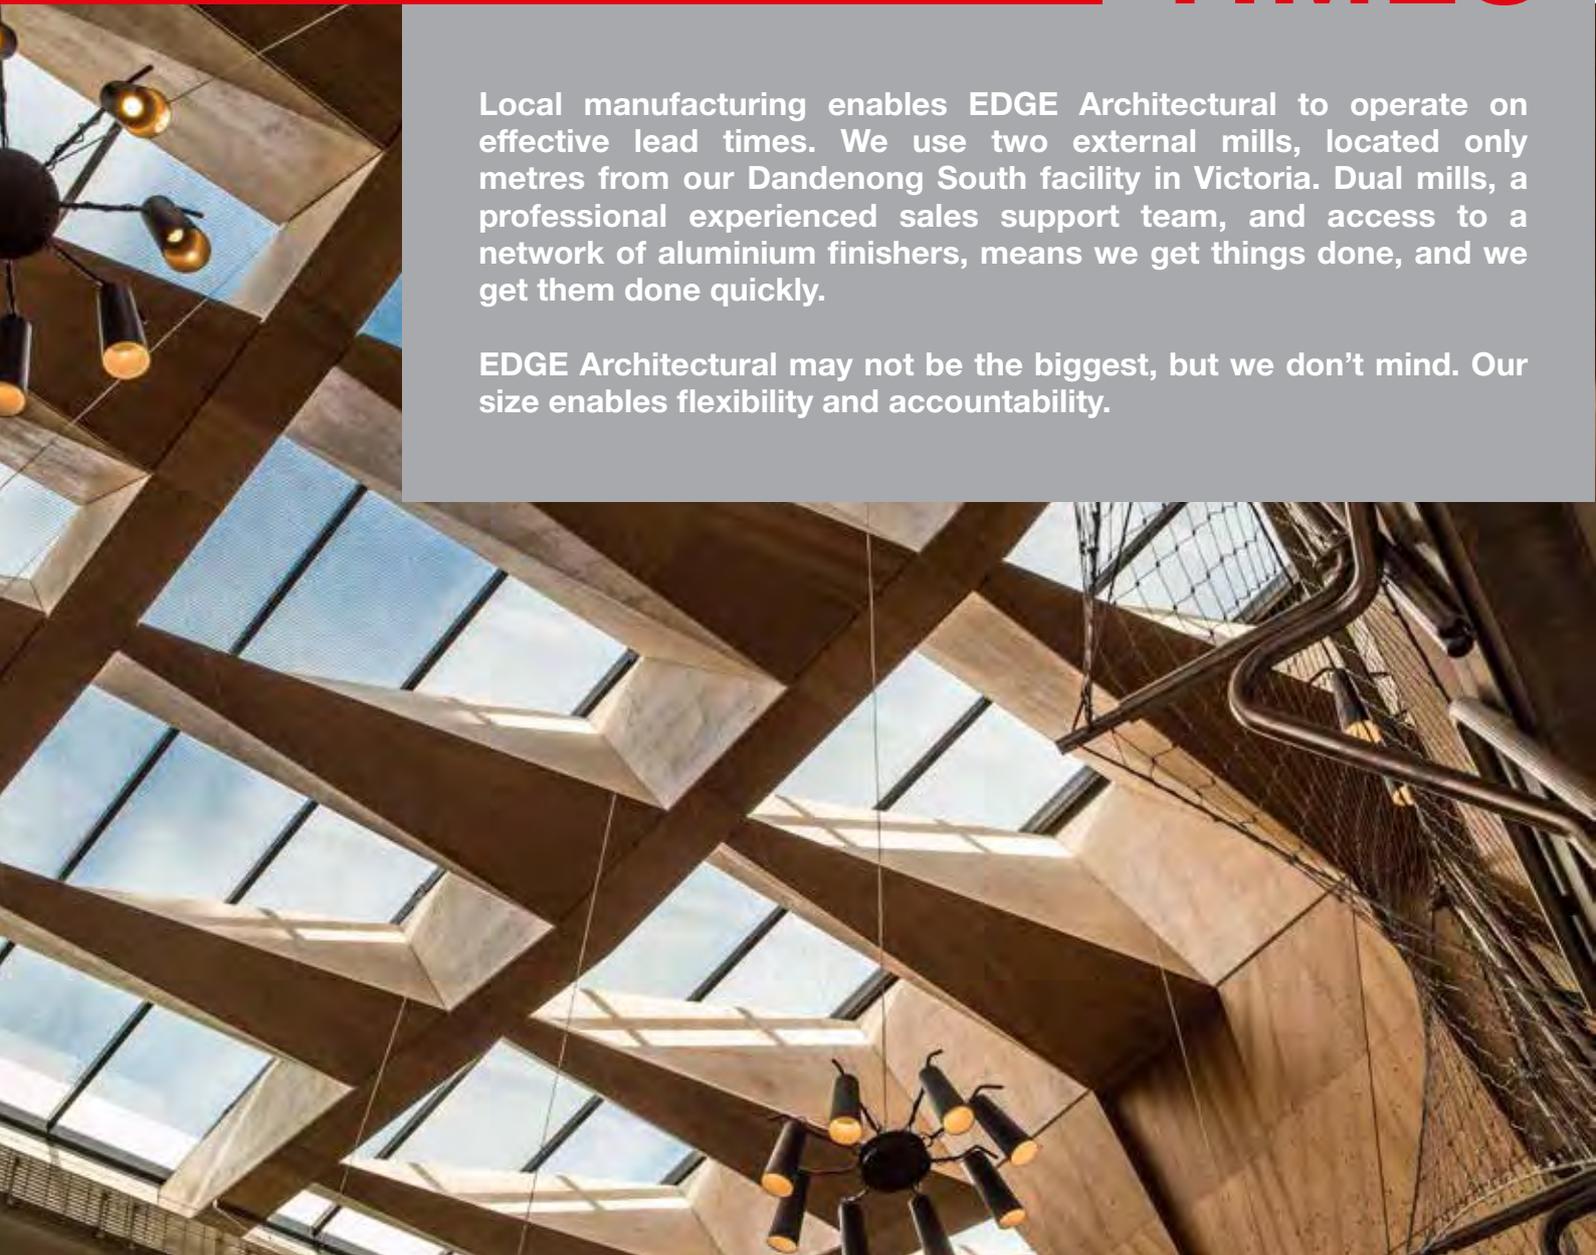

As an EDGE customer, you receive full support from Team EDGE. Your account manager serves as your first point of contact; our internal support team makes ordering and purchasing simple; and design and specification team will assist you with non standard details, architectural specifications and fabrication.

At EDGE Architectural, never feel alone.

STRATEGIC LEAD TIMES

Local manufacturing enables EDGE Architectural to operate on effective lead times. We use two external mills, located only metres from our Dandenong South facility in Victoria. Dual mills, a professional experienced sales support team, and access to a network of aluminium finishers, means we get things done, and we get them done quickly.

EDGE Architectural may not be the biggest, but we don't mind. Our size enables flexibility and accountability.

THE SPECIFICATION PLAN

The design community considers EDGE Architectural to be innovative leaders in aluminium framing systems.

EDGE Architectural takes specification seriously. Our dedicated architectural project managers, target architectural firms strategically, through project orientated communication.

A rich specification pipeline, ensures an exciting and productive future.

TRAINING AND CERTIFICATION

Our EDGE training program awards EDGE fabrication certification. After certification, training assistance is an ongoing, on call resource, for you and your team.

Training enables capability expansion, potentially propelling you to new levels of success.

Our induction certification program covers:

- Window and door history
- Understanding EDGE DNA
- Effective EdgePoint usage
- V6 and EDGE Connect tutorials
- Product fabrication and tooling modules
- Aluminium finishing and warranty
- Sales techniques and strategy

Have the EDGE over your competition with EDGE training and certification.

SERVICE AND SUPPORT

EDGE CONSULT

EDGE Consult assists you with all those curly questions and details, ensuring you always have the answers builders are looking for.

From energy ratings to product limitations and architectural customisations, EDGE Consult is here to support you.

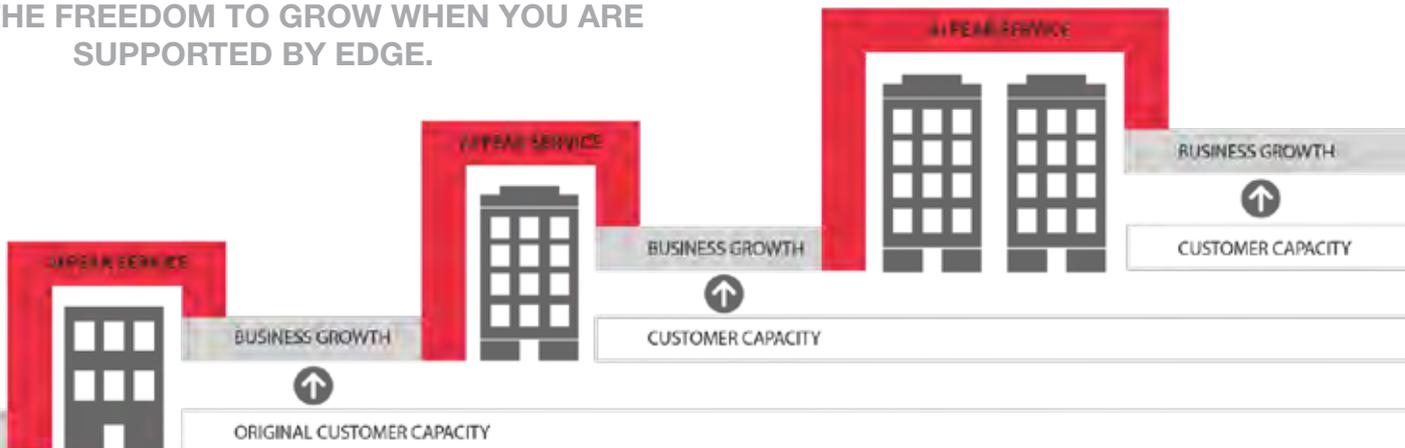

PEAK SERVICE

With EDGE Architectural's peak service, you don't have to say "no" to a project for reasons of capacity.

Peak service refers to our ability to support you with fabrication and finishing resources when you experience a peak in demand, or if you don't have the existing manpower to meet tight deadlines.

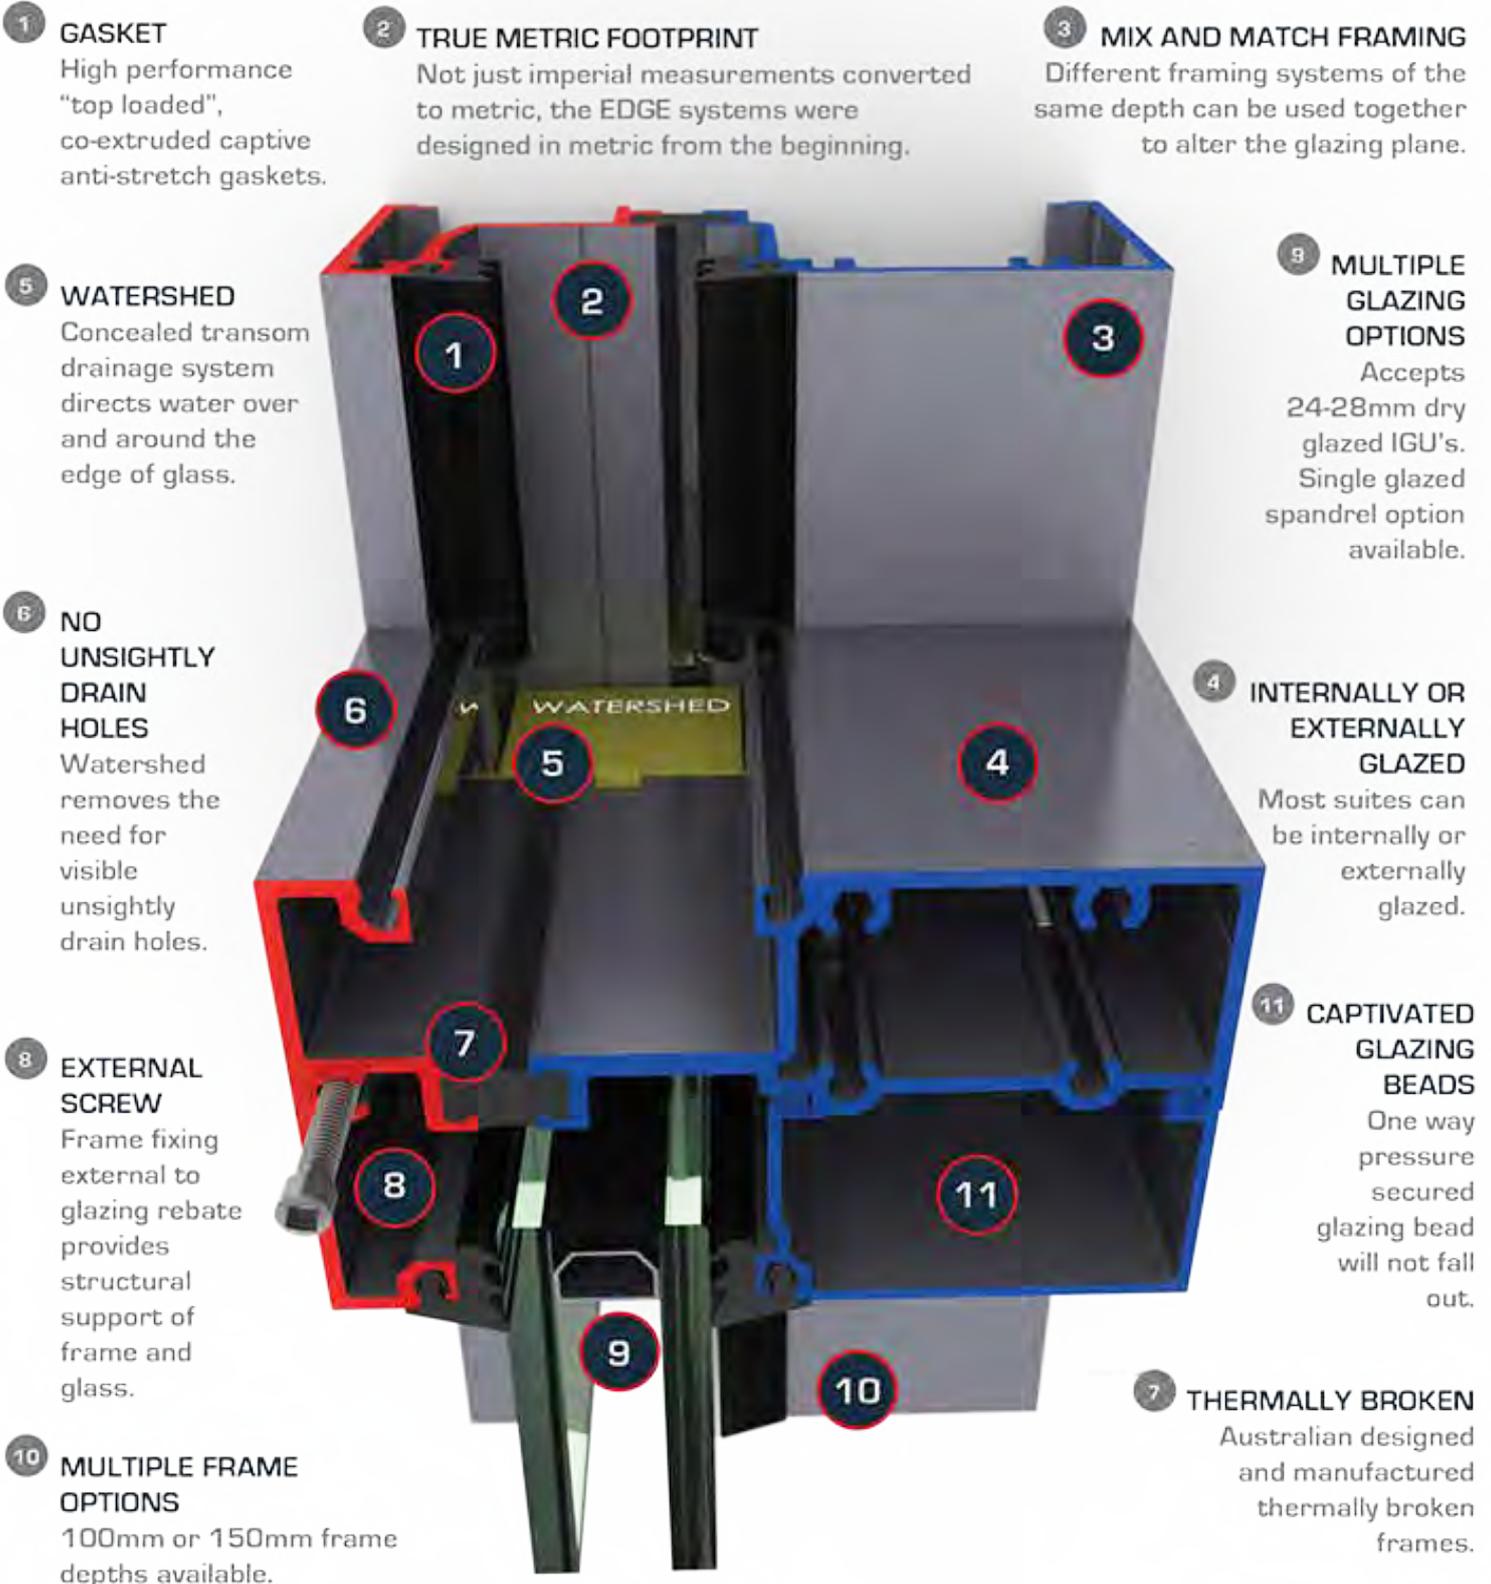

ENJOY THE FREEDOM TO GROW WHEN YOU ARE SUPPORTED BY EDGE.

Architectural Glazing Systems

U-max THERMALLY BROKEN DOUBLE GLAZE max NON-BROKEN DOUBLE GLAZE GEN NON-BROKEN SINGLE GLAZE

1 GASKET
High performance "top loaded", co-extruded captive anti-stretch gaskets.

2 TRUE METRIC FOOTPRINT
Not just imperial measurements converted to metric, the EDGE systems were designed in metric from the beginning.

3 MIX AND MATCH FRAMING
Different framing systems of the same depth can be used together to alter the glazing plane.

5 WATERSHED
Concealed transom drainage system directs water over and around the edge of glass.

9 MULTIPLE GLAZING OPTIONS
Accepts 24-28mm dry glazed IGU's. Single glazed spandrel option available.

6 NO UNSIGHTLY DRAIN HOLES
Watershed removes the need for visible unsightly drain holes.

4 INTERNALLY OR EXTERNALLY GLAZED
Most suites can be internally or externally glazed.

8 EXTERNAL SCREW
Frame fixing external to glazing rebate provides structural support of frame and glass.

11 CAPTIVATED GLAZING BEADS
One way pressure secured glazing bead will not fall out.

10 MULTIPLE FRAME OPTIONS
100mm or 150mm frame depths available.

7 THERMALLY BROKEN
Australian designed and manufactured thermally broken frames.

Mix and match thermally broken U-MAX™, double glazed MAX™ and single glazed GEN™ all within the one project with EDGE Architectural's compatible and interchangeable design.

DIGITAL RESOURCES

Time is precious, so we don't waste it. At EDGE architectural we want to make things easy as possible.

EdgePoint.com.au, a custom made digital portal allows unlimited 24 hour access to EDGE;

- Product catalogues
- Technical documentation
- Tutorial videos
- Project news
- Paperless ordering
- Order tracking

EdgePoint is easy to use and allows autonomous ordering and information access. Of course, you can still call us.

Simplify the way you work, and create your own personalised login on EdgePoint.

V6 AND EDGE CONNECT

EDGE Connect is the essential link to ensuring EdgePoint and V6 work to your advantage, saving you time and money. EDGE Connect is an aid to manufacture. Combining comprehensive quotation software and CAD details, EDGE Connect enables efficient processing from estimating and shop drawings to ordering and fabrication.
