

PRODUCT INFORMATION BULLETIN
POLYEURO® 5502F**ACTEW AGL**
SOUTH TAYLOR RESERVOIR
WATERPROOFING AND PROTECTION**LOCATION / JOB DETAILS**

Project: South Taylor Potable Water Reservoir
Waterproofing and Protection.

Client: Actew AGL.

Product: POLYEURO® 5502F.

Volume: 3,000 square metres.

Applicator: CRS.

Completion: June 2010.

ON-SITE REQUIREMENTS

- Stop water leakage from the concrete reservoir.
- Long term protection of the structure utilising a system with extensive track record in potable water projects.
- Provide a seamless coating to the walls and onto the floor areas.
- Superior crack bridging properties.

PRODUCT REQUIREMENTS AND BENEFITS:

- Fast cure, tough, resilient and elastomeric.
- All components of the system approved for use with potable water - AS/NZS 4020 : 2005.
- Provide a specific priming system to seal the porous concrete structure and enable a pinhole free coating.
