Introduction To Crown Commercial Group

Crown Commercial Group (CCG) was established in 1983 and is one of the few companies to offer the hospitality Industry A COMPLETE PACKAGE for their commercial requirements - from design and fitout to supply of refrigeration & commercial equipment, together with a 24 hour service facility.

CROWN COMMERCIAL GROUP has become a subsidiary of VINTEC AUSTRALIA, the leader in Wine Storage Cabinets. This association gives the two companies a strong financial and marketing basis, which reinforces their presence in the hospitality markets.

The CEO of Crown Commercial Group is BILL TRAHANAS, one of the two founders of the company. Bill is ably supported by a strong team of professionals, renowned in their field.

CROWN COMMERCIAL GROUP specialises in complete INTERIOR DESIGN and FITOUTS for cafes, restaurants, hotels, clubs and commercial centres.

It also supplies a wide selection of well known brands and custom-made COMMERCIAL REFRIGERATION and CATERING EQUIPMENT, which can be viewed online or at its large modern showroom in Marrickville.

CROWN COMMERCIAL GROUP also specialises in CUSTOMER SERVICE and has a 24 HOUR technical department available for queries or callout assistance.

40-44 Sydney Street, Marrickville NSW 2204

DESIGN & FITOUT

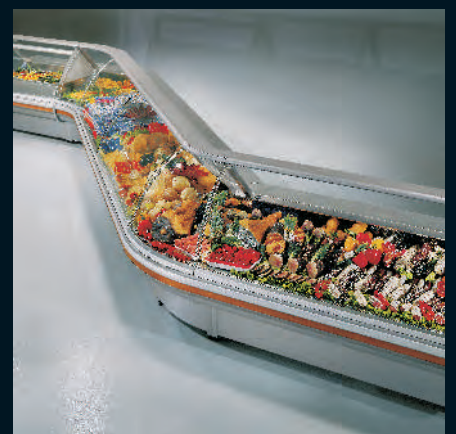

A major feature of the CROWN COMMERCIAL GROUP is our "COMPLETE MANAGEMENT PACKAGE" giving you the versatility for us to DESIGN & CONSTRUCT your project from DA APPROVALS to FIT OUT.

Our team will engage professionals to liaise with Councils, Architects and Design and Construction Contractors. However, should you prefer to use your own architect or builder, we would be pleased to work with them.

Crown Commercial Group - Specialist In All Types Of Custom Made Refrigeration Equipment

- . MAJOR BRANDS of freestanding refrigeration units (refrigerated counters, cake displays, freezers, etc)
- . VINTEC TRANSTHERM wine storage and serving cabinets
- . CUSTOM MADE Cool rooms, freezer rooms, and wine cellars
- . INSTALLATION of blast chillers

CATERING EQUIPMENT

CROWN COMMERCIAL GROUP offers a comprehensive range of CATERING EQUIPMENT from THE MAJOR BRANDS available in Australia.

Most of these can be viewed ONLINE at www.crowncommercialgroup.com.au or at the SHOWROOM - 40-44 Sydney Street, Marrickville (Monday to Friday 8.30 am - 5 pm - weekends and after hours on appointment)

CROWN COMMERCIAL GROUP offers PREVENTATIVE and ADHOC BREAKDOWN/MAINTENANCE SERVICE on all refrigeration equipment.

CROWN COMMERCIAL GROUP has a TEAM OF QUALIFIED REFRIGERATION TECHNICIANS available around the clock.

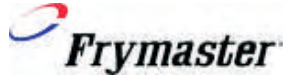

TELEPHONE 1800 771 776 for all service enquiries.

TRANSTHERM[®]
WINE CABINETS

SMART SOLUTIONS
FOR THE OPTIMAL
ENJOYMENT OF WINE

Enhance your passion for wine

At Vintec Transtherm we have a wine storage and serving solution to suit every need. Our cabinets are designed to protect your wines against all external influences, whilst allowing them to mature under optimal conditions.

Lifestyle

You love to entertain at home and it's important to you that your guests are well taken care of. A Vintec Transtherm wine cabinet is designed to be built into a kitchen and to enable you to make the most of your entertaining lifestyle. Have your best wines on hand ready to serve and you will be the toast of the party!

Epicure

You collect and consume the finest wine; therefore you should have the best storage and serving solution available. Vintec Transtherm is the first and only specialist wine storage expert in Australia and there is simply no substitute for the quality of our products. From ageing to serving to tasting, a Vintec Transtherm wine cabinet is the answer to every wine connoisseurs dream.

Hospitality

The way in which your wine is displayed and presented will add to the overall dining pleasure and experience of your clientele. Our premium wine storage solutions allow for the utmost ease of selecting and serving your carefully chosen wines. Let a Vintec Transtherm wine cabinet ensure your restaurant or cellar space is not only beautiful, but exceptionally functional as well.

WHY A WINE CABINET INSTEAD OF A FRIDGE?

Traditional refrigerators generate an intense cold environment which could dry out the corks and even worse, denature your wines.

Our cabinets respect all conditions necessary for the preservation and maturation of your wines.

VINTEC WINE CABINET TECHNOLOGY

Vintec and Transtherm climate controlled wine cabinets recreate conditions found in the world's natural cellars. With controllable temperature, adapted hygrometry, natural ventilation and vibration control, they bring the ultimate storage solution to your home, office or building projects.

Vintec and Transtherm wine cabinets are manufactured from quality materials and thoroughly inspected at all stages of production. Our cabinets are designed to protect your wines against all external influences, while allowing them to mature under optimal conditions.

While the Vintec range is economical and designed to suit the modern lifestyle, Transtherm has been designed to appeal to the connoisseurs and hospitality industry who demand perfect presentation and sophisticated storage for their premium wines.

More and more people are using our wine cabinets to;

- Safeguard their red and white wine from changing temperatures
- Have their wine ready to drink (with a multi-zone unit)
- Store their wine in an economical, space-saving and aesthetically pleasing cabinet
- Have their wines 'on hand' when entertaining

The temperature for single-zone wine cabinets should be set between 12 – 15°C, safely cellaring both red and white wine (which cellar at the same temperature).

Multi-zone wine cabinets graduate from 6°C at the bottom to 18°C at the top, ensuring your wines are ready to serve at the correct drinking temperature. Multi-zone cabinets are not designed for long term storage/cellaring.

Vintec and Transtherm wine cabinets offer 5 key elements that are crucial to the long term storage of red and white wine.

Temperature

Constant temperature is critical for maturation of both red and white wines. The recommended temperature for ageing wines is between 12 – 15°C.

Humidity

A humidity level of greater than 55% is essential to ensure the cork retains its quality. Too little humidity allows the cork to dry out, shrink and allows oxidation of the wine to occur. The thermal pump system of our wine cabinets ensures adequate humidity levels are maintained. In multi-zone wine cabinets the humidity reduces greatly, therefore these cabinets are only suitable for serving wines rather than long term cellaring and storing of wines.

Light

UV and fluorescent light is damaging to wines. The glass doors of our wine cabinets are double glazed and UV treated.

Vibration

Vibration can affect the flavour and bouquet of your wine. Our cabinets feature vibration absorbers and slow cycling balanced compressors to eliminate all residual vibrations.

Air Circulation

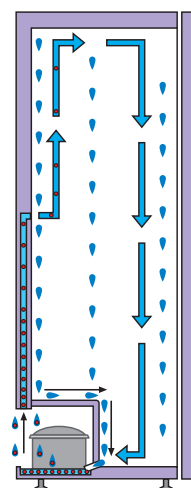

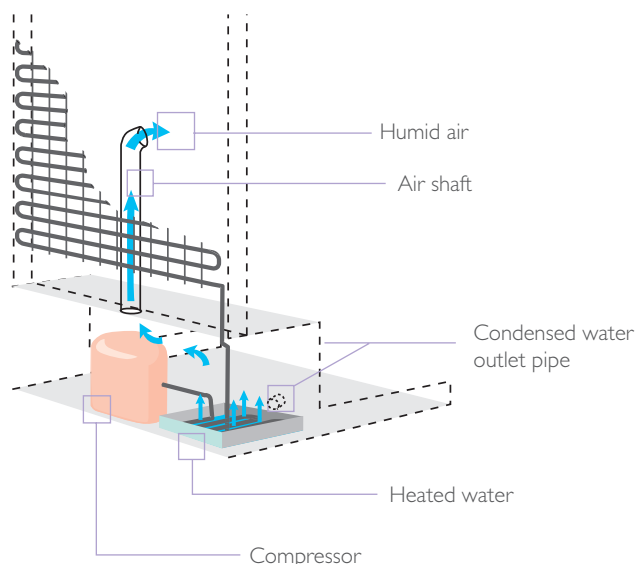

Air circulation prevents mould forming on corks. Our cabinets have air vents to ensure slow reticulated air flow.

All Vintec and Transtherm wine cabinets come with a 2 year warranty and are supported by an Australia-wide after-sales and service network. Vintec Australia offers a national distribution network to assist with any queries regarding their products.

For more information contact Vintec Australia on 1800 666 778.

THERMAL PUMP

The thermal pump process works by heating the condensed water, which then allows the introduction of humid air within the cabinet. This considerably increases the hygrometry and gives the cabinet natural ventilation and constant air circulation.

TRANSTHERM WINE CABINETS

Created from quality materials and carefully inspected at every stage of production, Transtherm cabinets are designed in a 5000 m² factory in France, dedicated solely to producing wine cabinets.

In the beginning, Transtherm specialised in the supply of refrigerated catering equipment used aboard railway carriages. Indeed, some of the world's most prestigious trains have been equipped by Transtherm.

The wealth of experience gained in this field was applied to the storage and maturation of wines in the 1980's, leading to the introduction of the first range of Transtherm temperature and humidity controlled wine storage cabinets. We invite you to discover the comprehensive range of wine cabinets and technical specialities that make Transtherm the benchmark brand in this field.

Transtherm encompasses two ranges of wine cabinets - Elegance and Prestige.

TRANSTHERM ELEGANCE

COLLECTORS ENTRY POINT

This range includes four sizes of single-temperature wine cabinets designed to maximise bottle capacity and to perfectly replicate the ideal cellar conditions for long-term storage of red, white and sparkling wine. Elegance is the standard range with electronic digital temperature setting/display, 4 universal solid beech wood shelves, understated black colour scheme and a choice of solid or glass door. Transtherm Elegance is a competitively priced product, synonymous with reliability and quality.

The Studio fitted cabinet is a small single temperature model, especially designed to be placed within a kitchen cabinet, under the bench top. Elegant and discreet with its black matt finish, the Studio cabinet can also be used as a 'stand alone'. It can be either fully integrated or alternatively, comes with a glass door.

The Elegance shelf in solid beechwood can be used either as a sliding shelf for 13 bottles or as a storage shelf for up to 77 bottles stored layer upon layer to maximise the bottle capacity of the cabinet.

The Elegance range's single temperature cabinets ensure optimal conditions for maturing your wine. Electronic regulation allows you to monitor the temperature of your cabinet to the nearest degree, from 10 – 14°C. The thermal pump ensures a stable level of humidity. Purchasing a wine cabinet from the Elegance range gives you the confidence of knowing that you have invested in a product with no compromises when it comes to your wine.

TRANSTHERM PRESTIGE

The flagship Prestige range represents the best technology that Transtherm has to offer – a combination of the latest innovations and advanced customisation options with a choice of colour finishes and equipment. The Prestige range encompasses single-temperature and multi-temperature cabinets.

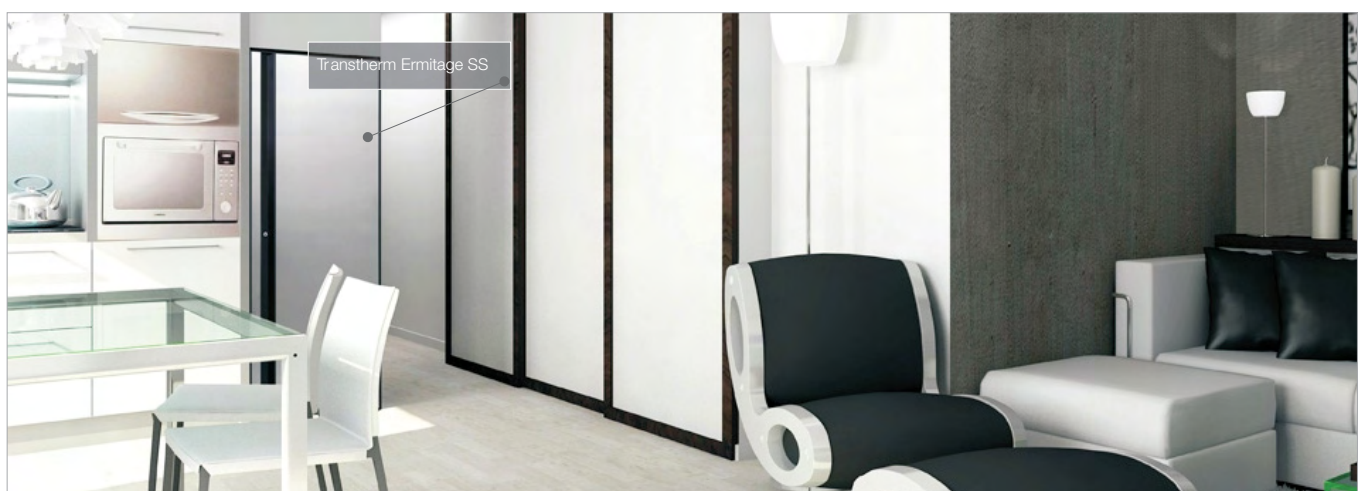

Transtherm Prestige single-zone units are designed to perfectly replicate those conditions found in an ideal traditional underground wine cellar – a steady temperature of 12-13°C with optimum humidity. The temperature can be adjusted between 6-18°C and the unit is equipped with a hygrometer as standard.

To keep track of each bottle located within the cabinet the solid door models come with a **cellar board**.

The range of Prestige shelves includes sliding, storage and presentation kits.

Transtherm Prestige multi-zone units are ideal for restaurants and entertaining as they are designed for serving wine at the correct temperature.

The Prestige range features a control panel incorporating an electronic digital temperature setting/display accurate to within 1 degree, cold lighting and temperature alarm (audio/visual) which provides a warning in case of malfunction.
