

The advantages of uPVC

Energy saving

uPVC walls are able to block UV, reducing the transfer of heat or cold.

Noise insulation

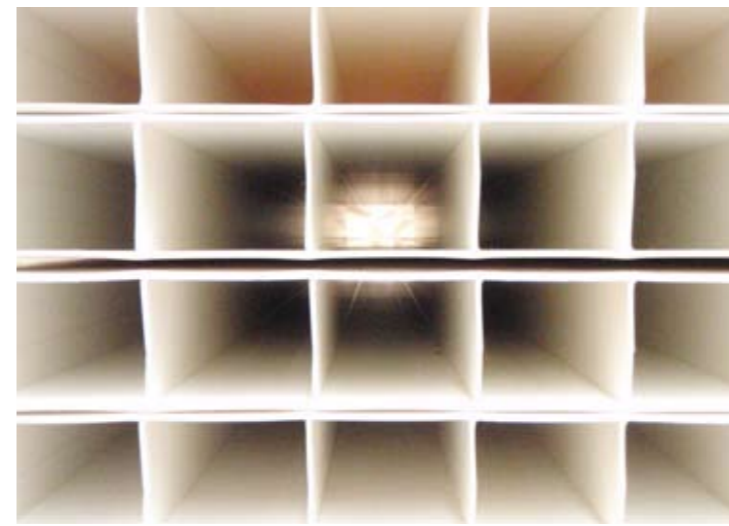

uPVC products such as windows, doors and ceilings can insulate noise efficiently, providing a quiet environment for residential or offices.

Excellent resistances

uPVC products are chemical proof, damp proof, weather/corrosion resistant and termite resistant.

Easy installation

They are easy to install, no bricks, no extra painting and maintenance free. They are ideal for residential, garages, office, and factory.

About Us

Structure building supplies manufactures uPVC building material many with patent rights.

We innovate "green building" with our main product uPVC wall panels. It is cost-efficient, fire resistant and easy to install. We also specialise in PVC doors, door frame, window, proof tile, floor boards, sliding/folding doors and windows.

Structure provides the highest quality and safety guaranteed products. Our expertises have over 25 years of experience in Hong Kong. Our products had been exported to many countries such as America, South America, Canada, Taiwan and Tahiti.
