OPTUS STADIUM CASE STUDY

Description

Voted “Most Beautiful Sports Facility in the World” in the Prix Versailles 2019 international architecture awards, Optus Stadium proudly shines through its unique bronze anodised aluminium façade and customisable LED lighting.

The 60,000 seat world-class multi-purpose venue is capable of hosting a range of sporting and entertainment events including AFL, cricket, rugby league and union, soccer and concerts.

Aiming to deliver on the “fan first” approach, offering users an exceptional experience no matter what event, the Galvin Specialised team designed a customised water solution for a healthier environment.

Being a local manufacturer, Galvin Specialised were able to provide quality customised product

solutions and fast after sales service to ensure strict construction schedules were met.

To conform with the challenging maximum water usage limit that was set for the project, an innovative sequential urinal flushing system was developed and installed. Other benefits of this electronic urinal flushing solution are its robust nature and the added health benefits of hands-free activation.

Addressing health concerns around lead content in water, the R&D team at Galvin also provided high performance electronic lead safe drinking bubblers that not only support the venue’s water saving goals but also ensure the delivery of safe drinking water. These bubblers were mounted on premium stainless-steel drinking fountains manufactured by another proud Australian company, Britex.

Testimonial

"Sanwell has a long-standing relationship with Galvin Specialised, and we have been installing their range of specialised products in multiple marquee projects throughout Western Australia such as Optus Stadium. Optus Stadium provided Sanwell with the unique opportunity to work with the R&D team at Galvin by assisting in the development of water-efficient flushing systems throughout the venue. Galvin Specialised product lines are well designed, robust and stand the test of time. Their product knowledge, sales and aftermarket service are exceptional, and these are the reasons why we place our trust in Galvin Specialised for our projects."

Brendan Long
General Manager, Sanwell Plumbing
