BALLARAT GRAMMAR SCHOOL

Project : Ballarat Grammar School

Product Feature : **DAHD0047** Plaza Superfast Hand Dryer

DSDR0152 SS Liquid Soap Dispenser 1200ML (With ABS Container)

Background

Ballarat and Queen's Anglican Grammar School, located in Ballarat and established in 1911, boasts a rich history and is considered one of the largest campuses in Victoria. The authority and facility management sought a low-noise hand dryer and an anti-corrosion soap dispenser to enhance hygiene standards. Once again, they turned to Dolphy Group, a trusted and reliable brand. Based on their requirements, Dolphy supplied the **DAHD0047 Plaza Superfast Hand Dryer (650W – 1450W, Cold & Hot Air)** with a noise level of 60-75 dB(A) and the **DSDR0152 Stainless Steel Dispenser** with a 1200ml ABS soap tank.

The Challenge & Solution

Schools and corporate facilities often face a common issue with stainless steel soap dispensers—corrosion, especially after periods of inactivity, as chemicals react with the metal surface. This results in costly replacements and is counterproductive to sustainability efforts. Additionally, noisy hand dryers are unsuitable for environments like schools.

Ballarat Grammar approached Dolphy for a reliable solution to these challenges. Committed to sustainable practices, Dolphy offered the DAHD0047 Plaza Superfast Hand Dryer (650W-1450W, Cold & Hot Air), **operating at a noise level of 60-75 dB(A)**, perfect for such environments.

To address the corrosion issue, Dolphy provided the DSDR0152 Stainless Steel Soap Dispenser with a 1200ml capacity, **featuring an ABS-lined pump** and inner surface. This design prevents soap from coming into direct contact with the metal, significantly reducing corrosion risks.

Dolphy's innovative solutions helped meet the client's needs efficiently while aligning with sustainability practices.
