

Absorbing Mechanical Noise

NoiseSorb Mechanical Noise Absorption

The Problem;-

Noise from heavy machinery, mechanical plant, air conditioners and compressors, disturb workers and neighbours

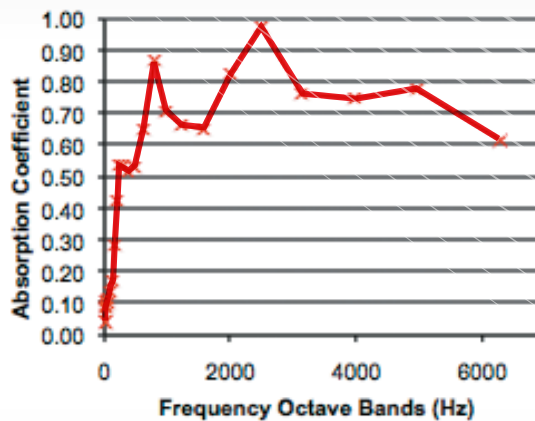

Mechanical noise from machinery can be a health hazard in work places

The Solution;-

Noisesorb™ Mechanical Noise Absorption Panels.

NoiseSorb is a closed cell polyethylene foam which has cells that are subsequently opened through the manufacturing process resulting in a highly effective sound absorption material. NoiseSorb all weather noise absorption panels are rigid, self supporting foam which is easy to cut and install on-site indoors and outdoors. Classified HIGH ABSORBENT - according to EN ISO 11654 - Class A

NRC 1.0 (Test Report No. 297999 to ISO 354.2003)

NoiseSorb Panels Specs:

Sound rating: NRC 1.0

(NoiseSorb as "Stratocell Whisper" Test Report University of Sydney 9.1.2012 and to EN ISO 354 2003 Instituto Giordano Italy).

Standard Panel size:
50 x 1200 x 2400mm.

Black or white laminated plank.

Installation: Can be installed as self supporting semi rigid panels. Fix using construction adhesive and/or mechanical fixing;- roofing screws with poly washers.
