

KEY FEATURE/BENEFITS OF THE VERDE MINI - COMPACT HAND DRYER

1. The easy to access drying area minimises the opportunity for cross contamination from other users, whilst this compact model is **ideally suited for Accessible Washroom facilities**, small office WC's, kindergartens & schools in providing a quiet, clean high-performance hand drying benefit for the user.

2. **Water Catchment** – excess water is captured in the base of the drying chamber, draining into a water reservoir (*drip tray*), minimising Slip Risk Hazard as perpetuated by use of contemporary style hand dryers in washrooms. NOTE: normal evaporation processes occur in low use environments reducing maintenance needs
3. The **Drip Tray and Filter** are easily accessible for maintenance/cleaning.
