

The O-Ring Pole-mounted bike rail is a retrofit option offering a cost-effective way to provide and promote bicycle parking by utilising existing urban infrastructure.

It is safe, convenient and easily installed to posts, poles and walls with security fasteners that are to remove – enabling them to be reused.

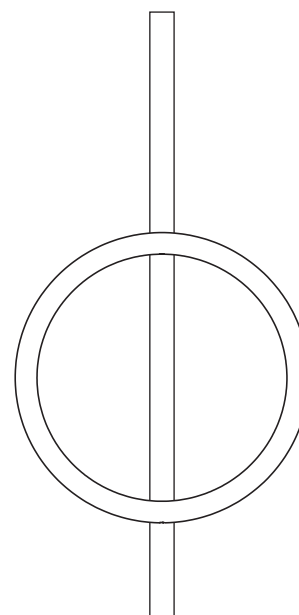

The design conforms to the AS2890.3 Class 3 level of secure bike parking facilities and the Disability Discrimination Act (DDA).

Product features

- Cost effective, convenient and safe
- Heavy duty construction
- Conforms to AS2890.3-2015 Class 3 security
- Anti-theft M10 bolts to suit a Ø60mm pole
- Pole-mount or wall mount options

Technical Details

Fixing Options	Wall mount <i>OR</i> Pole-mount (supplied with Anti-theft M10 bolts to suit a Ø60mm pole)
