# Opal Collection Progressive

Sleek yet attention-grabbing, our Opal Progressive collection effortlessly commands the spotlight while maintaining an understated elegance. Much like genuine stars, these taps, mixers, showers, and accessories captivate effortlessly without the need for excessive effort. They are available in a cutting-edge selection of finishes, including brushed gold, brushed nickel, brushed bronze, and graphite.

However, what truly sets the Progressive range apart is not just its appearance but its functionality. The mixer handle operates in three distinct zones – cold water, a blend of hot and cold, and hot water alone – promoting more efficient water usage. The moment you come into contact with these fixtures, you can both see and feel the exceptional quality. For instance, the tactile finish on the handles strikes a harmonious balance between visual allure and practicality. We have meticulously considered not only the aesthetics but also the everyday usability.

# Pearl

## Collection

---

The Pearl Collection of products is a throwback to those years when three-piece tapware was the norm. Combining the functionality of separate hot and cold water taps with contemporary, stylish designs, Pearl is a unique blend of old meets new. Up to date with today's most popular colour finishes, such as chrome and gun metal grey, this collection is sure to please even the most discerning style palette.

Continuing Nero Tapware's commitment to producing only the highest quality tapware and accessories, the Pearl collection carries many of our key product features. This includes water saving functions, the reputable brand of Neoperl aerators, and a coin operated feature that allows users to remove the tap filters for cleaning using just a simple coin.

## Discover the Micro Bubble Technology in Air Shower II

### Deep Clean, Deep Nourishment

Our shower's micro-bubbles have an incredibly small diameter, ranging from just 0.01 to 100 microns. This size is significantly smaller than human skin pores, which typically measure between 20 to 200 microns. Due to their minuscule size, these micro-bubbles can effortlessly penetrate the pores, reaching the deeper layers of the skin. This allows for a more effective and deeper cleaning compared to regular shower droplets, ensuring a thorough cleanse down to the microscopic level.

### Effective Sterilization, Water Purification

Our micro-bubble shower releases hydroxyl radicals, known for potent oxidation. They quickly neutralize bacteria on skin and in water, ensuring deep sterilization. This makes our shower ideal for sensitive skin, transforming each use into a holistic skincare experience, promoting both cleanliness and skin health.

### Efficient Oil Control, Gentle Cleanse

The micro-bubbles released by our shower are made up of non-polar molecules with a hydrophobic nature, efficiently binding with oils and effectively removing them from the skin's surface. This ensures a prolonged feeling of freshness while minimizing any unwanted shine. This is particularly beneficial for oily or acne-prone skin, aiding in oil control and preventing blemishes. It improves the skin's texture, making it softer and smoother.

### Baby-Friendly Bathing

The fine micro-bubbles generated ensure that a baby's delicate skin remains untouched by harsh water streams, creating a safer and more comforting bathing experience. The powerful sterilizing effect is especially crucial for babies. Let your baby love the bath and enjoy it.
