

RT7

THE PERFECT LED REPLACEMENT
FOR 50W HALOGEN DOWNLIGHTS

ML-RT7

neutral white / warm white / white housing

ML-RT7-BA

neutral white / warm white / brushed aluminium housing

M-Elec, the leaders in Australian LED innovation, present the RT7 kit. A complete LED retro-fit solution, that retains the popular look & feel of halogen downlights. Featuring the latest COB LED technology and advanced wide beam optics, the new RT7 kits offers the conventional look of halogen, with the huge energy savings benefits of LED, at an exceptional price!

Through the unique 80 degree beam angle, high CRI (>80), & high efficiency driver (up to 86lm/W), the RT7 produces substantially better light distribution than conventional halogen lamps at a fraction of the running cost. The RT7 comes in 3000k warm white, offering rich, warm tones for living areas & bedrooms & 4000k neutral white, offering clean & soft tones for kitchens and general purpose lighting. Both colours are available with a white or brushed aluminium trim.

The RT7 is designed in Australia from the ground up, with advanced thermal properties & all the excellent dimming capabilities that M-Elec is renowned for. The lamps are also available separately (GU10/7-W/WW).

LED downlight kit includes:

- 1 x GU10 Bulb, 1 x Downlight trim, 1 x Lamp holder,
- 1 x Terminal block, 1 x Australian approved flex & plug

EXCELLENT DIMMING CAPABILITIES*

UP TO 85% ENERGY SAVINGS**

ULTRA WIDE BEAM ANGLE

*Dimming to 1% with Clipsal Trailing Edge Dimmer.

**Energy savings based on 7W LED compared to 50W halogen bulb.
