

MAXI BEAM

The elegance of heavy duty timber beams without the hassle of working with solid timber!

Simple, Bold and Attractive • Lightweight, Rigid and No Twisting • Environmentally Preferable

Introducing MAXI BEAM

MAXI BEAM is the lightweight beam system that provides incredible visual style while also being easy to specify, and fast to install!

1 Minimal framing required
MAXI BEAM weighs only around 3kg/Lm for a 200mm deep beam. This lightness relieves the support structure of extra load and means you don't need specially engineered framing.

2 Looks good long-term
MAXI BEAM does not warp or twist like solid timber can. The honeycomb core provides extreme rigidity, impact resistance and enables architects to create larger cantilevers.

3 Better acoustics
MAXI BEAM is acoustically diffusive. Install under a perforated SUPACOUSTIC ceiling or SUPABAB black acoustic backing boards to achieve acoustic absorption. Contact us for detailed backing option drawings.

4 Quick install
MAXI BEAM proprietary fixing systems include fixing cleats and installation instructions. Affix to an open suspended frame, a suspended ceiling, walls or as a screen from floor to ceiling. We provide fixing system engineering certification.

5 Long span fixing
MAXI BEAM can be fixed at up to 2400 centres. Even longer spans are possible for screens and custom situations.

LIGHTING IT UP

Integrate lighting to point the way

SUPALAMI Striped Mahogany laminated shaped beams with integrated LED lighting at IGA Romeo's Food Hall in Sydney's MLC Centre.

SCREENS

Define areas while maintaining continuity and flow

SUPASURFACE V-Series Blackbutt textured laminate finished beam screens create zones in the waiting room at Kogarah Dental Clinic.

MIX IT UP

Play with directions, size and colours

Beams in varying depths and lengths finished in 3 contrasting SUPALAMI colours at South Hedland Shopping Centre in WA.

FEATURE ZONES

Define a space

SUPALAMI Light Oak laminate finished beams define the reception area at Jellyfish, The Shard, London UK.

TAILORED SHAPES

Adaptable as your imagination

Criss-cross tapered beams in SUPAFINISH Tasmanian Oak with integrated lighting at ANZ Raranga in Auckland NZ.

WHAT IT IS...

MASSIVE CEILINGS

Create a chunky beam look

SUPAFINISH Tasmanian Oak laminate finished beams used across the vast ceiling of the multipurpose hall at Chevalier College in Burradoo NSW.

FLOATING CEILING FEATURES

Create proportion, intimacy & interest

SUPALAMI Rustic Oak laminate beams form floating rafts on the ceiling of the foodcourt at Westfields Penrith NSW.

installation video

MAXI BEAM is so versatile that it inspires customers to come to us with ideas.

In response, we've been making MAXI BEAM even more adaptable including options such as:

- › Tailor-made shaping
- › Integrated lighting
- › More finishes
- › Finishes to match panels and slats
- › Extra-large beams
- › Longer unsupported spans
- › Fire-retardant options

Download our MAXI BEAM Ideas showcasing more than 30 ideas.

If you can **imagine** it, it's possible with MAXI BEAM

Standard Sizes

FR Options

Beam Size	Fire Group 3 Min. Centres <i>(less of equal to 328% Surface Area)</i>	Fire Group 2 Min. Centres <i>(less of equal to 130% Surface Area)</i>
120x50	90mm	225mm
