

Eveneer WoodWall

Quick Facts

Eveneer WoodWall is a revolutionary pre-finished timber panelling system primarily for plaster and plasterboard walls. Produced from real wood veneer it is applied directly to plaster or plasterboard just like wallpaper, with no requirement for any heavy substrate and at less than half the cost of traditional veneered panelling. Eveneer WoodWall can also be applied to MDF, particleboard, metal, etc.

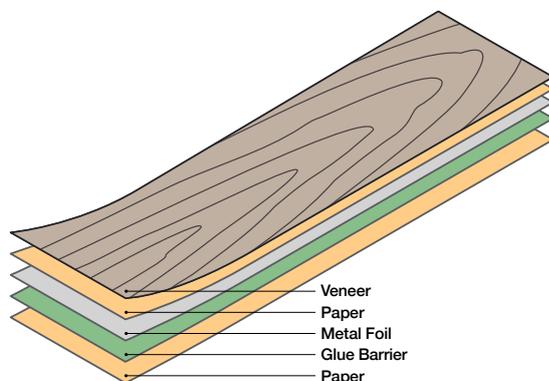

Suitable for residential and commercial applications including hospitality, retail, office, yacht and aircraft interiors, Eveneer WoodWall may be used on walls, elevators, columns, beams and ceilings.

Its outstanding flexibility means it can be applied to tightly radiused and curved surfaces.

Available in a range of Eveneer real wood species, the large number of sequenced and numbered sheets assures consistent matching.

Eveneer WoodWall is Group 1 Fire-rated—Average Heat Release Rate: 15.3kW/m², Average Specific Extinction Area: 19.9m²/kg

UNIQUE PATENTED 5-PLY CONSTRUCTION

ADVANTAGES

- Real wood veneers
- Cost effective—substantial savings compared to conventional timber veneer wall panelling
- Applies directly to plasterboard with clay-based wallpaper glue or PVAC
- Applies directly to MDF and particleboard with PVAC
- Applies directly to metal and plastic with contact glue
- Flexible for application to curved surfaces
- Folds around a 1mm radius (along the grain) for seam free corners
- Long sequence runs—matched and numbered
- Group 1 fire-rated on plasterboard, metal and Group 1 rated MDF or particleboard
- Quick and easy to install by wall-covering professionals with standard wall-covering tools and minimal site disturbance
- Convenient rolls for easy delivery to site
- Environmentally friendly—up to 300% the yield of conventional veneer slicing and only 3% of the timber used in traditional wall panelling.
- FSC certification on ALP lIignum species
- Can be custom stained or digitally printed with your logos, text or images.

SIZES

Width: 930mm (Refer to website for exceptions)

Length: 2750 / 3050mm standard. (Up to 4000mm lengths and 1220mm widths, subject to availability and lead time—minimum 50 sheets)

FINISH

Eveneer WoodWall is supplied pre-finished with one sealer coat and one polyurethane topcoat with an effective gloss level of 5%. Increased durability is available by specifying our exclusive Elite finish multiple application topcoat available in 30% or 70% gloss.

CUSTOM STAIN

Eveneer WoodWall products can be made to order and custom stained.

CUSTOM INLAYS AND DIGITAL PRINTING

Lasercut inlays are possible through a process of removing the base layer and replacing it with one or more contrasting layers. Digital printing can be applied directly to the surface of the Eveneer WoodWall sheet which is then coated with a resilient protective finish.
