

Architectural Trims

Catalogue Edition 4

The Choice of Professionals

The Choice of Professionals

Trims are an essential element in delivering a professionally finished project, and at DTA, our trims are of recognised industry standard. While many DTA trims are manufactured in Australia using local and imported materials, others are imported. Whether locally manufactured or imported, DTA ensure they maintain the highest quality product standards. DTA's market leadership is the result of a quality product range, developed through consultation with local and international trades. Through extensive research in both European and Asian markets, DTA are able to offer a range of trims that will satisfy the most demanding of customer applications. While most DTA trims will be available from retailers or from the DTA state warehouses, specialised profiles can be supplied with a phone call to a DTA state office.

INDEX

TRIM SELECTION

STAINLESS STEEL
Grade 304 and 316L (Marine Grade)
Ideal for coastal areas

Highly recommended for public and high traffic areas due to mechanical strength and chemical resistance. It is used in many architectural and technical applications.

BRASS
Grade C380

Brass is an elegant material and is highly regarded by architects and interior designers. It is best suited to indoor application and has a warm gold colour.

ALUMINIUM
Grade 6063T5 (Plain & Anodised)

Aluminium has a wide variety of applications and is sought after for its range of profiles and complex shapes. Aluminium is also lightweight, ductile and easy to cut and use. DTA offer many variants of finish, including bright and matt colour anodising.

PVC
UV Stabilised

A remarkably versatile material that has wide ranging applications in many building projects because of its corrosion resistance. Available in many designer colours. It is economical and easy to use. Not recommended for external use.

Handy Hint – Always remove excess grout immediately after grouting to avoid discolouration.

EDGE TRIM

EDGE TRIM

DTA Finishing Edge Trims are designed to provide edge protection where tiles are bordered by carpet or timber, or as a decorative edging.

The DTA Finishing Trims range adds a contemporary look, while still providing maximum tile protection.

Finish Edge Trims are available in PVC, Aluminium, Brass and Stainless Steel finishes.

PVC Round Edge Trim - 2.5metre

- PVC round edge trim
- Professional looking quadrant finish
- Highest grade PVCU construction
- Use with all tile types
- Available in 17 fashionable colours

MERCHANDISING

MERCHANDISING

DTA offer our resellers a number of versatile display options. We have display stands that are suitable for wall mounting or floor display. Regardless of the size of your retail area, a DTA Trim stand is the best way to display and maintain your stock levels. A DTA Trim Stand enables customers to easily compare and select the best trim for their project. In larger stores, trims can be segmented and displayed on multiple stands, allowing separate display of metals and PVC. Please call your DTA representative to discuss the most suitable package for your retail needs.

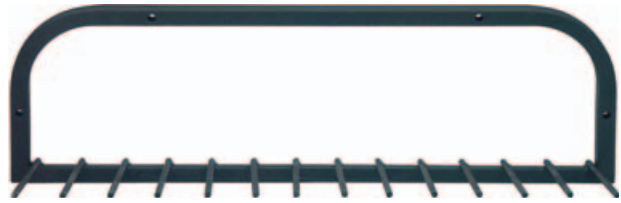

Angle Merchandising Stand 3metre

Code: **PBAS3**

Pk Qty: 1
