

ArchiLam®

Anti-slip glass flooring

Glassworks decorative range

ArchiLam[®] anti-slip glass flooring combines the beauty and clarity of glass on a surface that is even safer to walk on than conventional flooring.

Available in an opaque and extra clear pattern grip from Italy, ArchiLam has been rigorously tested to European standards and deemed safe to walk on in wet and dry areas. Being custom laminated by Glassworks to the customers' structural requirements makes it a robust and versatile flooring option, not to mention an eye-catching one which deflects dirt and dust more than other substrates. LED lighting gives it that extra flair.

Pattern options

- Pixel (extra clear)
- Punto (opaque)
- LED lighting available on request

Laminate options

- Pattern grip component is 6mm thick
- Custom laminated to achieve required overall thickness
- Toughened glass layers in various thicknesses with structural interlayers available
- Must be engineered by the customer for structural integrity in order for Glassworks to laminate to spec

Applications

- Stair treads
- Commercial flooring
- Concept flooring
- Feature flooring
- Pool areas
