

Smart solutions

The complete lead free flashing range

WAKAFLEX

'Lead Free' Flexible Flashing

SMARTFORM
FLEXIBLE ROOF FLASHING AND ALL PURPOSE REPAIR TAPE

FLASHTITES

'Lead Free' Penetration Flashing

There is a growing trend towards the use of non lead roof flashing products in recent years. Both tradesmen and property owners increasing awareness of the hazards such as toxicity, water harvesting contamination as well as OH&S issues on building sites associated with the use of lead is driving this growth. This movement towards alternatives to traditional lead flashings is set to continue and grow as the range, availability and sophistication of these solutions increase and users are educated in the unique benefits associated with using them.

Evo Building Products now has Australia and New Zealand's **widest choice in colour, size and product solutions in the non lead flashing Category to cover all possible situations and budgets.** Available nationally through all good merchants Evo Building Products is the supplier of choice for your next generation flashing requirements.

The 'Lead-Free' Roof Flashing System

WAKAFLEX

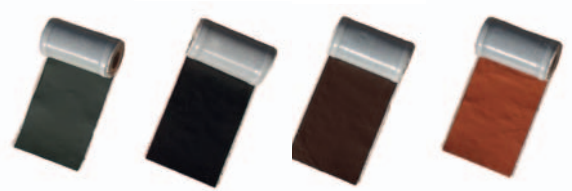

'Lead Free' Flexible Flashing

Wakaflex is the longest established (2004) and leading non lead flashing solution available in Australia. Suitable for most roof profiles and types it is the only butyl based flashing with a unique chemical self bonding ability and without a fully backed adhesive for easier installation. In development and testing for over 4 years it has an aluminium honeycomb mesh embedded into the UV resistant butyl based rubber which allows for easy dressing to any roof profile without the use of any tools or additional silicone.

With a malleability that provides a water tight seal immediately it is perfect for use in pitch transitions, wall abutments, step and chimney flashings. **It's lighter, easier and quicker to use, looks better and is safer than lead.** Try it on your next project and see for yourself why so many have already left lead behind.

- **Suitable for Rainwater Harvesting Systems** - Wakaflex complies with requirements for AS/NZS 4020:2005 'Products for use in contact with Drinking Water'.
- **CSIRO Tested** - Wakaflex complies with the CSIRO requirements for AS/NZS 2904:1995 'Damp Course Flashing'.
- **Non Toxic** - There are no potential hazards for installers and no contamination for run-off water.
- **Lightweight** - Wakaflex weighs only 4kg for a 5m roll
- **3 Sizes** - Wakaflex is available in three widths: 280mm, 370mm & 560mm.
- **Quick & Easy To Install** - There are no special skills required and Wakaflex can be installed up to 50% quicker than similar flashings. Scissors or a Stanley knife is all that's required to install.
- **Temperature Stability** - -40° C to 100° C in accordance with DIN 52133. Can be laid in hot or cold conditions.
- **UV Resistant** - In accordance with DIN 16726.
- **Laying Length** - Wakaflex does not expand or contract in hot or cold weather, so it can be installed in complete 5m lengths and with only a 30mm lap joint Wakaflex will chemically bond with itself for a secure seal.
- **Over-flashing** - Wakaflex must always be over flashed or chased into brickwork.
- **Guaranteed** - Wakaflex comes with a 10 year nationwide guarantee.

The 'Lead-Free' Roof Flashing System FLASHTITES

'Lead Free' Penetration Flashing

To complete the roof flashing system Evo building products have created the Flashtite. A unique pre-fabricated roof penetration flashing manufactured using a Wakaflex base. Available in 4 sizes to suit all penetrations sizes, Flashtites are available in lead grey and can be painted to suit any background colour if required. Flashtites like Wakaflex also come with a 10 year guarantee.

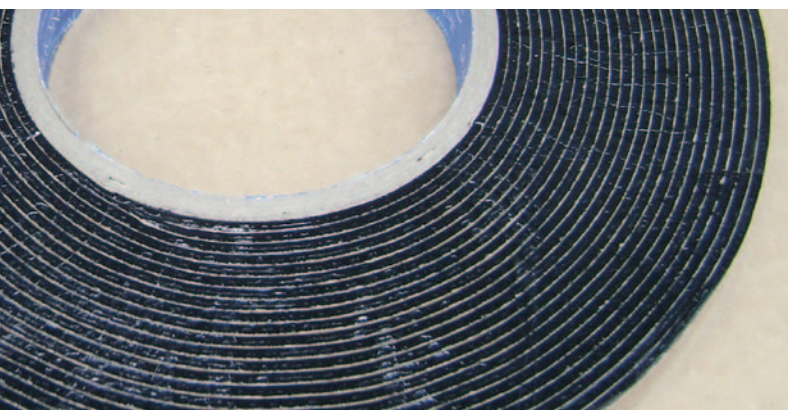

Features:

- Non toxic
- No painting necessary
- Quick and simple to install
- Non corrosive
- Light weight
- Integral Adhesive System

Available in 4 sizes:

- 5-40mm
- 50-90mm
- 20-125mm
- 100-150mm

Butyl Adhesive Strip

Butyl Adhesive Strip is a pure black Butyl strip 10m long by 20mm wide. It can be used to seal Wakaflex and Flashtites in more complex fitting situations as well as just a general waterproofing adhesive in many other situations.

Butyl will not dry out like bitumen and will adhere to almost all materials as long as they are clean and oil free.

This Butyl strip is perfect for general flashing maintenance and to ensure a quality and long lasting seal.
