

InStyle Decking

Style, convenience and authenticity

InStyle natural timber decking solutions from Urbanline offer head-turning elegance and practicality. Benefit from the timeless natural beauty of real timber, as well as the attention to detail and design guaranteed to deliver the finish and sophistication that modern architectural applications demand.

Perhaps the most notable feature of InStyle Decking is the hidden fixing system, which offers a seamless, nail-free finish. This feature is based on the same principle as traditional secret nail tongue and groove fixing. Where InStyle Decking differs, is the nylon-concealed fixing clips, which clamp directly onto the specially-profiled lips on the edge of each board and then screw into the joist, securing the decking for life. This process creates continuous lines, unspoilt by surface fixings and offers a significant health and safety advantage, eliminating the risk of injuries to bare feet from exposed nails. It also permits the

natural movement of timber—in all directions—without the risk of splitting or compromising the integrity of the fixings. This ability primes InStyle Decking to withstand tough Australian conditions. In addition to the aforementioned benefits, the non-destructive clamping action of the fixing clips also allows for full recyclability of the timber. InStyle Decking can easily be demounted and reinstalled elsewhere if your needs change.

Adding to the aesthetic appeal of InStyle Decking, is the inviting allure of the curved top surface, which softens the overall impression of

the deck and encourages barefoot enjoyment. The visible grain of the timber speaks for the authenticity of the product and adds life, dimension and warmth to the space. In fact, InStyle Decking is so stylish and smooth that it equals the beauty and consistency of internal flooring, making the transition from indoor to outdoor living areas seamless and natural.

InStyle Decking can be ordered pre-oiled. Factory pre-oiling saves time on-site and gives the penetrating oil a chance to soak in prior to the timber being handled.

Technical information

Features and benefits

There are so many great reasons to choose InStyle Decking

Nail free fixing system

Nylon-concealed fixing clips clamp directly onto the edge of each board and then screw into the joist, allowing natural timber movement.

Precision machining

Accurate and constant timber profiles for a perfect finish.

Gently curved top face

Softens overall visual appeal, inviting barefoot enjoyment.

Concave bottom face

Minimises contact with the joist to eliminate instances of trapped moisture, which reduces the occurrence of timber rotting.

Australian hardwoods

Only the best Australian hardwoods and other reliable species are used to ensure genuine quality.

Kiln dried

This product is kiln dried for stability.

Pre-oiling available

Factory pre-oiling saves time on-site and gives the penetrating oil a chance to soak in prior to the timber being handled.

Thinking green

Urbanline is committed to sustainable building practises to ensure the longterm survival of our planet, with minimal environmental impact. Responsibly-harvested timber from carefully-managed resources is one of the most sustainable building products known to man. As such, we only source timber from reliable resources to uphold our commitment.
