TUFFMESH® EMBERGUARD

This product is Australia's highest grade aluminium screening product. It is designed for bushfire prone areas subject to heavy ember attack and to repel pine trees, jacarandas and other fine debris. The mesh is ideal for possums, birds and vermin, water tanks and areas where fine and heavy tree debris falls.

The 1.6mm aperture is the smallest hole size of any screening material, assisted by a water trap to ensure maximum water collection.

Tuffmesh Ember is the most durable gutter guard available designed by Screen Tech and fabricated and powder coated by Australian Companies in Australia.

Specifications:

LWG: 6.0mm

SWG: 3.0mm

Aperture: 1.6mm (average hole size)

Plate thickness: 0.8

Strand width: 1.2mm

Features and benefits:

Strongest Aluminium guard

One way mesh for maximum water filtration

Water catching trough to ensure full catchment of water

Complies with AS3959-1999 / Australian Bushfire Standards

CSIRO tested flammability index of zero, Suitable to BAL 29

Akzo Nobel D1000 powder coating. Powder coated in Australia

25 year material warranty
