TOP 4 REASONS WHY CLIENTS CHOOSE LINEA

1

Wide range of cabin finishes & colours

The Linea home lift range offers a clean and modern selection of various finishes, cabin options, materials, accessories to give your home an unmissable touch.

Each lift is designed to reflect your preferences, with most elements being able to adjusted to suit your decor or environment.

2

Made-to-measure projects

A versatile home lift which can be adapted to every property: narrow shafts, dedicated areas indoor or outdoor. Linea Lift is a discreet solution to assist in movement around the house.

The cabin dimension vary from a minimum of **500 x 1000mm** and a **maximum of 1100 x 1400mm**. Minimum pit of 200mm which can be created but not necessary.

3

Safety and comfort

Home and commercial lift with extreme usability to improve the comfort the user experience such as smooth and silent ride, -automatic return to the floor in case of power failure, able to work with 3 different operations: **(hold-to-run, automatic operation at landings and automatic operation both in car and at landings)**, Remote control on the lift system and telephone connection inside the cabin and Proactive maintenance.

4

Energy efficiency

Linea home lift requires low energy and respects the environment, it saves money on the bill and reduces air pollution.

- **Class A" energy rating** according to the German Directive VDI 4707, for energy efficiency in the building industry
- **95% manufactured** with recyclable materials
- The Linea Lift with traction model requires only 0.75 kW, the **same as a vacuum cleaner!**
- **Eco friendly home lift:** the CO2 emissions are reduced by 70%
- The Hydraulic Drive allows for exceptional **dimensional flexibility**
- **The Gearless Drive, that does not imply the use of oil,** is managed by a Smart-Inverter
- The thermal-break doors guarantee the **thermal insulation** between the outdoor lift and the inside of the building

MAKE YOUR HOME MORE ACCESSIBLE

Home elevators are the best way to get from floor to floor in your house! They're convenient, accessible, and can be installed anywhere that meets the requirements. **Plus, when you're ready to sell your house, it'll give potential buyers one more thing on their list: [accessibility options](#) (and we all know how important this is!).**

STYLISH & ELEGANT SOLUTIONS

TAILOR-MADE LIFTS

Each Linea Lift is tailor-made to suit your specific dimensions and preferences from a wide range of finishes/features.

Simplifying Accessibility

Transform any home or commercial premises into a place that all people can easily traverse. With limited builder's works required, Linea lifts are quick and easy to install, usually within 1-2 weeks.

The Linea is an alternative to high-speed elevators, which can attract high servicing costs and upfront costs.

Lift Solutions For Every Building

Architects and industry professionals highly regarded our vertical lifts for commercial and residential applications that may provide you with the answer to your access dilemmas.

If you're looking for a bespoke solution that takes your project to new heights, look no further. Our lifts are perfect for commercial and residential usage with an extensive selection.

We have installed hundreds of lifts in different organisations such as offices, schools, childcare, retail, restaurants, churches and more building types throughout Australia.

STUD FRAMED SHAFT

WITH INTERNAL LINING

- 2x Steel support by customer or builder
- Indoor or Outdoor
- Cost-Effective
- Reduced installation time
- Easily sheeted in your choice of material

They are used in residential construction as the most cost-efficient lift shaft method. Direct Lifts will supply detailed drawings with loads for the projects engineer to integrate into the buildings plans. With a commercial project, confirm fire rating/materials required with certifier/fire engineer.

Minimum Pit:

Swing Door - 100mm
Sliding Door Hydraulic - 150mm
Sliding Door Gearless - 200mm

MANSONRY SHAFT

- Provided by customer or builder
- Indoor or Outdoor
- Fire Rated
- Low Maintenance

Traditional lift shaft design is structurally robust for heavier loads and fire rated.

For more significant effect, the lift car can have glass walls in combination with murals/graphics within the shaft walls.

Minimum Pit:

Swing Door - 100mm
Sliding Door Hydraulic - 150mm
Sliding Door Gearless - 200mm

FULL GLAZED SHAFT

- Provided by Builder & Glazier
- Usually Indoor Environments
- 1x Structural Wall & Door Frames Requirements
- A Bespoke Feature To Any High-End Project

We will supply a detailed drawing and support with the integration of the lift and glazing for a successful result.

A high level of attention to detail is required.

Minimum Pit:

Swing Door - 100mm
Sliding Door Hydraulic - 150mm
Sliding Door Gearless - 200mm

METAL GLAZED SHAFT

- Provided by [Direct Lifts Australia](#)
- Indoor & Outdoor Rated
- Powdered Coated In Any RAL Colours
- Wide Range of Glass Colours

We can install a finished product with a proprietary engineered frame. A range of glazing profiles is available to suit your preference in appearance.

Glazing Profiles Available

Minimum Pit:

Swing Door - 100mm
Sliding Door Hydraulic - 150mm
Sliding Door Gearless - 200mm

GEARLESS

Saves **90% less energy** compare to other system

- Whisper-quiet operation perfect for residential and business contexts
- Best option for low to high traffic applications
- Smoother ride w/ VVVF controlled electronics
- No oil required with the Gearless Drive
- Re-leveling function to handle load changes
- The emergency automatic rescue device prevents passengers from becoming trapped inside the lift during a power failure.

DRIVE TYPE	1:1 or 2:1 (Heavy Duty) Traction with Low Friction Gearless Motor
STANDARD	NCC E3.6 "Small Sized Low Speed Automatic Lift" AS1735.11, AS1735.12, AS1735.16, AS1735.18
TRAVEL HEIGHT	Up to 12m for Commercial or Residential
LOAD	250 kg - 300 kg - 350 kg - 400 kg - 450kg
MAX STOPS	6
TRAVEL MAX	12
