# Maxi Film

*Our popular joinery panel in designer colours*

Maxi Film shows off the plywood edge detail we all love beneath a protective film.

Exterior-grade plywood decked in a smooth, hard coating of phenolic or melamine film on both sides makes Maxi Film weather and moisture proof as well as resistant to abrasion and damage from common chemicals.

The solid colour of the film coating contrasting with the exposed edge detail makes it a spectacular choice for joinery projects, ceilings and walls. It can also be used in demanding areas like kitchens and bathrooms, without compromising style.

Maxi Film is an industrial product, each sheet is unique and has some natural features which add character to the product. This is inherent with Film face products and in no way affects the overall performance of the product.
