

Compare EzyJamb Door Jamb Profiles

EzyJamb is the flush door jamb system that eliminates the need architraves around the door frame and blends seamlessly into any modern square set interior design.

EzyJamb is available in three flush profiles to suit a variety of applications:

All EzyJamb profiles:

- Are manufactured by Studco Building Systems, using high quality BlueScope cold-formed steel.
- Have perforated sides for flush jointing around the plasterboard, making them the fastest, most economical way to create flush door frames.
- Are specialty coated and meet the finished surfaces standard AS/NZS 2311:2009 to ensure they can be painted immediately.
- Have surpassed the 10,000 door slam test, proving their durability.
- Are available with premium RocYork concealed, herline or lift off hinges.

With three EzyJamb profiles to choose from, we have outlined a few key differences on the next page that will help you to choose the right product for your project.
