walling built better

## Educator learns the benefits of logicwall®

University of Sydney, Lismore Campus NSW 2480

### After 100+ years of building them, Woollam knows walls

Few companies can claim a century, let alone 130 years, of delivering quality. Woollam Construction's commitment to perfection has been (and remains) unwavering. This yardstick is also the one they used in selecting afs logicwall® as the walling system for their Lismore project.

### Our customer says...

#### Walling that's load bearing and long wearing

We used afs logicwall® as finished walls from the common areas through to hallways and bedrooms. The logicwall® system provided us with a superior program advantage and significantly reduced our ceiling partitions contract as we could simply set and paint the walls.

Our client, University of Sydney, likes that the logicwall® system is a finished wall and is extremely hard wearing in this high traffic student accommodation, along with the significant reduction in maintenance requirements compared to conventional batten and sheeted walls.
