

Fast, hygienic
& environmentally
friendly hand dryers

Get the Verdé edge

Cut your paper costs with our fast, hygienic and environmentally friendly hand dryers.

Fast

Powerful air stream wipes away water and dries hands in under 10 seconds.

Hygienic

Serviceable filter helps to minimise the spread of bacteria.

Efficient

Uses significantly less electricity than conventional hand dryers. Saves money and time.

Eco-friendly

Low carbon footprint. No paper waste.

Quality

Manufactured from strong, durable, ABS plastic. One year full warranty. Three year warranty on motor and circuit board, maxi only.

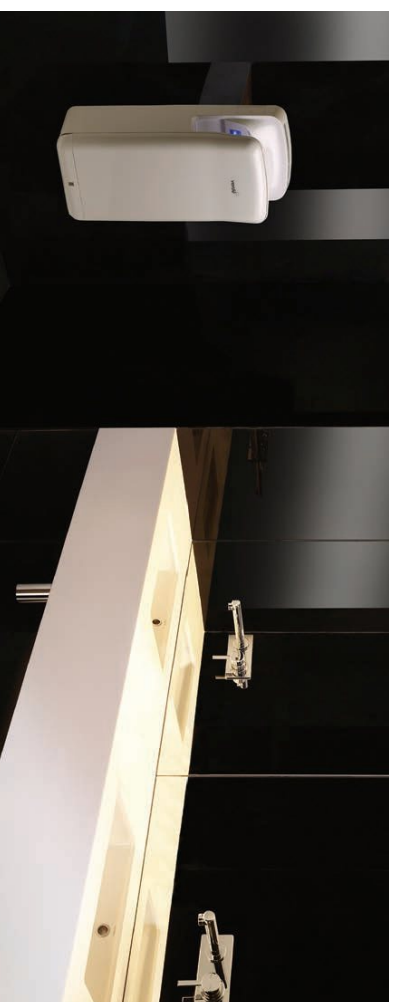

Design

Classic and elegant design will blend with all decor.

Verdé maxi

Verdé mini

Take advantage of our unique technology

Infrared sensors detect hand positions in micro seconds. A powerful motor directs airflow through jets to the front and rear of the hands, drying them in less than 10 seconds.

Options

Hot or cool air selection.
Two speed motor selection.

Safety

Built-in electrical sensors detect temperature and power faults.

Brushless motor

A brushless motor eliminates wear and tear, delivering stable, long term operation.

Hygienic filtration

Drying is entirely non-contact for absolute hygiene.

High speed airflow

The streamlined nozzles concentrate and increase the airflow velocity thus creating an effective mechanism for the drying of hands in under 10 seconds.

Automatic operation

Sensors detect the insertion of the hands and trigger the drying cycle. Once hands are retracted, the unit will automatically switch off.

Noise

Significantly quieter than other hand dryers - only 69dB on high speed and 67dB on low speed.

Power in options

Power can be supplied via standard 10 Amp plug or can be hard wired via an isolator switch.

Drainage tank

Built in tank captures excess water in a clean and safe manner. Drainage tank can be emptied and cleaned manually.

The Verdé edge

Verdé hand dryers are designed as a versatile solution to suit a range of uses and locations. Our unique technology is incorporated into two different formats and styles so you can select the product that best meets your needs.

Specifications

MODEL:	AK2006H
STANDARD:	AS/NZS 60335
CERTIFICATE NO:	12040701
PROTECTION:	CLASS1
IP CODE:	IPX4
VOLTAGE:	240V
CURRENT:	8.6A
FREQUENCY:	50HZ
POWER RATING:	1650W-1990W
NOISE RATING:	69dB - high speed 67dB - low speed
AIR FLOW READING:	48L/s - high speed 44L/s - low speed
HEIGHT:	685MM
WIDTH:	300MM
DEPTH:	220MM
WEIGHT:	11KG
