

Sustainable, Durable & Affordable

A versatile building panel made entirely from wheat straw.

THE BENEFITS OF DURRA PANEL

Sustainable Using a renewable biomass by-product Durra Panel embodies CO2 emissions from the atmosphere.

Simple Installation All Durra components are sent to site pre-cut and finished ready to be installed.

Acoustic A naturally effective material for noise control.

Thermal Readily achieves the level of performance required by the building code of Australia.

Durable Manufactured through high-density compression, Durra Panel combines the desirable properties of high strength & rigidity.

Fire Resistant Has extensive test history in accordance with Australian Standards and global certification.

Trafficable Can be safely walked upon to become a trafficable work platform.

Recyclable 100% Recyclable & 100% biodegradable.

Durra Panel is a fully-certified wall and ceiling panel that insulates against sound and heat while being stronger, safer, and cheaper than other building materials that can assist your project in achieving its green building rating targets.
