

Just **Digital** Signage

It's a new look, an easier way to display your directory board.

Digital Directory Boards

- ▶ Update tenant information quickly and simply
- ▶ Easily change colours, backgrounds and fonts
- ▶ Update the content anywhere, anytime
- ▶ Enhance the look of your building foyer

Now the office building can instantly update its tenant directory via the Internet.

Using the cloud based software www.DigitalDirectoryBoards.com gives you complete control over your directory content – anytime, anywhere – online.

Remove the delays and costs in waiting for the sign-writer to manually update the directory. Instantly change names, symbols, and building information. You can even add widgets to display weather, news, stock etc.

Directional directory boards lets you make your mark:

- Update information quickly as tenants move in or change their details.
 - Change the look of your directory to match the building's branding.
 - Lift the look of your lobby with a dynamic and eye-catching display.
-

What do we offer?

Just Digital Signage offers you the full signage service. Not only do we supply and install LCD display and custom enclosures to fit your space and maximize your exposure, but we provide ongoing training and support. That means we're always available to answer questions – whatever you need for your digital directory, we're here to help keep those important names up in lights.

More than just directory boards...

Along with digital directory boards JDS also offers digital signage solutions that can be used to display a wide range of information. Be it on a single screen, or an impressive large video wall you can display news, weather, stocks and exchange rates just to mention a few.

With increased environmental awareness, buildings are now using digital signage to display a wide range of data including power usage, water consumption and even solar panel stats to keep visitors and tenants conscious of the consumption of services.
