RESTORATION SYSTEM

GLASS SCRATCH REMOVAL

EnduroShield can repair glass scratches on retail shop fronts and commercial properties that have been damaged by vandalism.

Graffiti scratches are the most common cause of glass damage in public areas and shopping centres. Replacing the glass can be a very expensive and sometimes impractical solution. EnduroShield Certified Restorers can quickly and effectively remove scratches from many types of glass surfaces at a fraction of the cost of replacement. Common areas exposed to vandalism include:

- Retail shop front windows
- Shopping centre facades
- Glass awnings
- Glass railings

SHOP FRONTS & SHOPPING CENTRES

Presentation is an extremely important factor in the retail sector. Shop fronts are used to showcase merchandise and attract customers. Glass doors and windows are the first thing that potential customers see which can greatly impact their overall impression. Shop fronts, restaurants, cafes and shopping complexes are all exposed to graffiti, which looks unsightly and deters customers, costing sales.

Vandalism to glass is caused when objects such as stones, cigarette lighters and metal tools are driven into the glass. This has left business owners and property managers with costly glass replacement and lost time in business interruption.

EnduroShield Certified Restores can efficiently remove all depths of scratches onsite, without distorting or weakening the surface. Glass is restored back to a near new finish with amazing results, saving shop owners, business owners and property managers in time and replacement costs.
