Anti-slip glass

Vidrio antideslizante

Definition

Crisand is a creative laminated security and safety non-skid glass specially indicated for flooring or treads. It offers a wide variety of design options to adjust different project needs.

- Crisand-VS: Soft and deep acid etching and/or sandblasting with custom made patterns
- Crisand-D: Transparent anti-slip surface, suitable for interiors
- Crisand-G: Translucent highly efficient non-skid ceramic frit (meets ASTM F-1679)

Any of the above options can be combined with either colored, graphic or translucent PVBs.

Definición

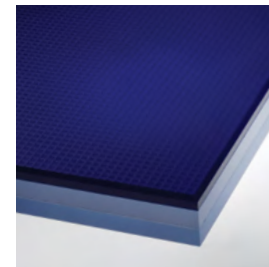

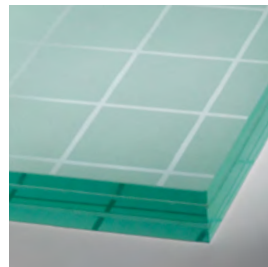

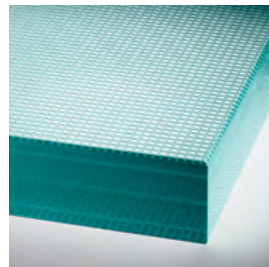

Crisand es un vidrio antideslizante laminado de seguridad, especialmente indicado para suelos, que destaca por su versatilidad decorativa.

- Crisand-VS: Patrones rebajados al ácido o a la arena
- Crisand-D: Serigrafía antideslizante transparente, adecuado para interiores
- Crisand-G: Serigrafía translúcida altamente antideslizante

Cualquiera de las tres opciones básicas puede ser combinada con polivinilos butirales translúcidos o de color.
