WELCOME

LOUVRELINE PANELS // THE COLLECTION

Welcome to the Australian, NZ and Pacific Collection of Product Brochures.

Our range of all aluminium Louvreline Flush and Weatherboard Panel blades are a new concept for Wall Panels, Louvres or Balustrades.

This brochure covers our Louvreline Panel product range and is number 2 of a Collection of 6 brochures. Please refer to the back cover for details of the full Collection available.

FLUSH FIT OR WEATHERBOARD PANEL

This brochure introduces an additional range of Louvreline product to compliment the existing Flush Panel louvres. There is now available a 125mm and 180mm Weatherboard Panel. Developed for a specific project, we liked the look so much we have introduced them into the full product range.

Now there is the choice of a smooth flush panel finish, or the beveled weatherboard appearance of the new system. The blades can be used vertical or horizontal and open up many new and innovative design options.

LOUVRETEC QUALITY

We pride ourselves on the quality and reliability of all our louvre systems.

Our product is only available through a nation wide Authorised Louvretec Dealer Network. All our Dealers have been trained in the supply, installation and servicing of our custom designed and engineered fully warranted product range. We look forward to being of assistance with design and product recommendations from concept to completion.

Thank you for taking the time to consider our products, we hope this brochure provides ideas and inspiration.

Bill Collins DIRECTOR // LOUVRETEC GROUP

A NEW CONCEPT

Louvreline Flush or Weatherboard louvre panels provide an interesting design alternative to conventional louvre blades.

LOUVRELINE FLUSH AND WEATHERBOARD PANELS

// A NEW CONCEPT WALL PANEL, LOUVRE & BALUSTRADE

120MM LOUVRELINE FLUSH PANEL

In response to many requests we are pleased to introduce the new 120mm Louvreline Panel system.

This scaled down version of the 200mm Panel enjoys all the features of the larger louvre - with the added benefit of complying as a balustrade. With the panels fully open the gap between the blades is less than 99mm. Suitable for use not only as an operable balustrade, but also to close off decks, verandahs or use as a conventional louvre panel.

200MM LOUVRELINE FLUSH PANEL

Ideal as vertical external panels in front of joinery or for closing off decks and verandahs. Literally they become a snug fitting, adjustable wall panel, enabling you to enjoy a wide view looking forward while achieving a high degree of side and rear privacy.

The slim line 200mm wide panels are only 27mm deep giving over 165mm clear space when opened. They are extremely strong, the elegant all aluminium triple box section design allows good spans both vertically and horizontally. The 200mm blade offers both centre and rear pivot options.

125MM LOUVRELINE WEATHERBOARD PANEL BLADE

As an alternative to the 120 Flush Panel, the 125 Weatherboard also complies as a balustrade with a maximum gap of 98mm when open. Either motorised or hand operable they are suitable as an operable balustrade and a conventional louvre panel.

180MM LOUVRELINE WEATHERBOARD PANEL

Also suitable as vertical panels or as conventional horizontal louvres. Opening through 180 degrees they give a wide angle forward view and a high degree of side and rear privacy. When fully closed a 'weatherboard' effect is achieved. With the option of motorised or hand operable this unique system offers a wide range of custom design options.
