Extremely Flat (only 10 cm from the wall) and silent. Removable and washable dust air filter.

IP24 splash water protection and double electrical insulation.

## PLUS

Touch Screen Controls

Presence Sensor for energy Saving

Programmable Timer

Towel Rails + Hooks for extra towels

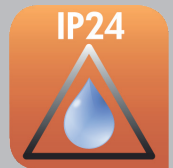

Frost Free Function

Removable and washable dustfilter

IP24 Class II

TOUCH is an intelligent energy saving control based bathroom fan heater. Designed with an INFRARED SENSOR INTEGRATED into the front screen it detects if someone walks into the bathroom guaranteeing the right comfort level which is controlled by an electric thermostat. After 10 minutes if nobody is moving around the room it automatically switches to ECO MODE (3.5°C less than comfort temperature) adjusting the power consumption to a lower level.

This unique fan heater will save you up to 25% energy compared to traditional fan heaters. If someone enters the room it will take a few minutes to bring the temperature back from ECO to COMFORT level.

TOUCH can also be programmed to come on at a certain hour and certain temperature to ensure the bathroom is warm when you wake on a frosty morning.
