

PILOT

Portable staging solutions

Operation: Aluminium legs are placed in the corner brackets and wing nuts tightened by hand. The leg is securely held in the corner with a sliding T piece. Podiums are attached together with a hand tightened Klemm-fix connector. Accessories are attached to the podium aluminium extrusion using T bolts, and hand wheels are finger tightened.

Storage: The QUATTRO Storage Trolley Kit is compatible. It contains four wheels and a handle which are added to a podium, allowing for up to 20 podiums to be stacked on top.

Customisations: If adding an access ramp, you can choose to have it with or without a ramp landing. In addition, there are tiered stage configurations available for seating or performances.

Safety Modular Steps

Stage Curtains

The PILOT Modular Staging System is closely based on the QUATTRO design, providing a versatile and economical choice for a portable staging solution.

An attractive and viable stage solution for all performance and event requirements, our PILOT Stage is manufactured in-house, so we can customise a system to your exact requirements. Compatible with the QUATTRO range of accessories, the standard PILOT design features a black timber stain podium finish, or alternative timber stain colours are available.
