

At home with
Geostone[®]

Polished & Honed.

The strength of Geostone® is its
natural beauty.

Experience the warmth and natural beauty of Geostone® polished and honed concrete floors. Polished and honed concrete offers a stylish flooring solution that is practical to maintain while providing a contemporary finish to any home.

Recognised as a leader in internal and external concrete solutions, Geostone® has a range of beautiful polished and honed concrete solutions to suit your space. Like a fine wine, the natural variations of our regionally sourced Australian stone add character and personality, while the thermal qualities of the concrete regulate the heat giving your space a natural ambient temperature.

Come home to Geostone® today.

Regionally sourced.

Our polished and honed concrete incorporates natural materials such as stone sourced from local regional areas, resulting in finishes with subtle and unique variations that are distinct to your location.

Installer network.

We have a network of over 140 Geostone® installers who can provide guidance on our range of products and care and maintenance requirements.

Durable and stylish.

Our polished concrete is both durable and stylish. Its natural thermal qualities help to regulate the rooms' ambient temperature. The addition of underfloor heating takes comfort to another level.

Backed by Holcim.

We are a leading supplier of polished and honed concrete in Australia and part of the Holcim group – a global leader in building solutions.

Geostone®

Make an impression with
Geostone[®]
polished and
honed concrete.

Natural.

Polished and honed concrete is a naturally durable material. It's designed to handle heavy foot traffic and gets better with age, unlike other flooring materials. Its naturally stylish qualities mean it fits into any home.

Resilient.

This hard-wearing, resilient material has a smooth and luxurious feel underfoot. Always on-trend, not only is it a functional flooring solution, but it's also long-lasting – maintaining its colour beautifully.

Cost effective.

Polished and honed concrete is a cost-effective solution that could save you money in the long-term. Low on maintenance requirements, it's a flooring solution that flexes to your lifestyle and potentially adds resale value to your home.

Diverse.

Concrete incorporates natural materials that have variations in colour, texture, size and shape. It's these natural variations that give the concrete its character and charm – making it uniquely yours.

Regional.

Bring a dash of Australiana to your home by featuring natural materials like stones, sand, pebbles and even flecks of ore. Our range of mixes all use regionally sourced Australian stones.

Experience the warmth and natural beauty of Geostone[®] polished and honed concrete.

No matter what style you're after or the area of your home you want to enhance, Geostone[®] has a range of solutions to meet the needs of any home owner. Apply polished flooring throughout your home, or explore bringing a honed finish into wet areas (e.g. bathrooms) for a natural and textural non-slip surface.

Polished:

Geostone[®] polished concrete provides a refined premium look for any room, including kitchens, living rooms and bedrooms. Comfortable underfoot, Geostone[®] polished concrete brings warmth and beauty to any home.

Honed:

Geostone[®] honed concrete provides a subtle, textured matt finish perfect for outdoor entertaining, alfresco and pool surrounds. The honed texture offers an ideal balance of grip, comfort and durability.

Giving your home the Geostone[®] treatment.

We've pulled together a guide to help you plan your Geostone[®] installation and make sure you get the very best results.

STEP 1 Do your research.

Deciding what floor you want for your home can be influenced by several factors. Take the time to consider not just how you live but also your longer-term lifestyle plans, to find the best solution for you.

Lifestyle. Concrete is an easy living, lifestyle solution. It's hard-wearing and easy to clean, meaning you get to spend more time doing the things you want to do.

Longevity. Want to minimise wear and tear but don't want to ask everyone to take off their shoes, then timber flooring or concrete, rather than carpet, might be the solution. Don't forget those furry friends, pets can cause real damage to timber floors.

Odours and cleaning. Carpet tends to absorb smells and requires regular cleaning. If you're worried about keeping the home clean and free of odours, concrete is your best option.

Value. Geostone[®] is low-maintenance, requiring little to no upkeep. Over longer timeframes, you can make significant savings from not having to maintain and repair.

STEP 2 Make it yours.

Geostone[®] products are unique to their areas, incorporating stone sourced from regional quarries. Get to know the concrete products from your regional area.

Our website provides all the finishes you can get in your area in both exposed concrete, and polished and honed concrete. We also have Geostone[®] Display Centres located across Australia, which are a great way to see the different solutions and how they vary.

STEP 3 Quote and install.

You can choose to install Geostone[®] using your installer or one of our Approved Installers. Our Approved Installer network are suggestions only. Geostone[®] recommends that each customer undertake their own research into the appropriate contractor for their project.

STEP 1: Choose your concrete mix.

STEP 2: Request a quote by visiting geostone.com.au/get-a-quote.

STEP 3: If you would like to use one of our Approved Installers, select the Supply & Install option on our request form. Supply & Install quote requests received via our website are sent directly to a Geostone[®] Approved Installer in your area who will contact you directly to provide your quote.

If you prefer to use your own installer, we will quote to supply the raw materials at a cubic meter delivered rate.

For any further questions, pop on our live chat at geostone.com.au or call our friendly customer service team on **13 11 88**.

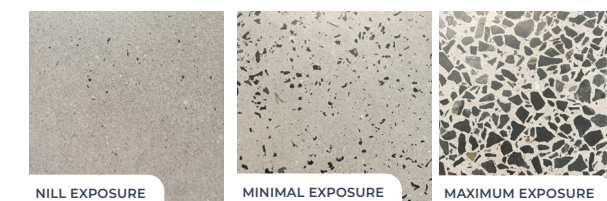

STEP 4 Geostone[®] your home.

Installing your Geostone[®] is a process that begins before the concrete is delivered to your home for your installer to install.

Site preparation and concrete placement.

Concrete placement is a craftsman's skill that involves site preparation, pouring and levelling, curating and finishing, and setting time, which can vary depending on the area and take up to three days.

Exposing the final finish. Your installer will discuss with you the amount of aggregate you want to expose. Deciding between nil exposure, minimal or random exposure, and maximum is a personal decision based on the desired result you want to achieve. Once chosen, your installer grinds back the concrete mix removing any debris from the surface and gives it a final clean.

Create beautiful indoor areas with concrete.

Our range is designed to assist homeowners, architects, designers and builders in creating functional and beautiful spaces, both indoors and out.

A solution for any space.

Geostone® is an ideal flooring solution that works in all areas of the home. There's a natural warmth and comfort that comes from the underfoot texture, making it suitable for most rooms in the house. Include underfloor heating for a truly luxurious feeling during those cold winter months.

Bathroom.

It is often assumed that concrete floors are slippery when wet, but Geostone® can be prepared with a slip-resistant finish that makes them safe and comfortable underfoot. Additionally, you can use concrete sculptural feel to feature elements in your bathroom – such as the bathroom basin.

Laundries.

Modern laundries call for a sleek minimalist design and easy-to-clean surface areas. Like bathrooms, laundries are another wet area perfectly suited to concrete flooring.

Not only will decorative concrete bring life and colour to your bathroom, ensuite or laundry, it can also absorb and release thermal energy, keeping the temperature of your home comfortable all year round.

Kitchen.

This cost-effective flooring solution suits any kitchen space and is available in a wide range of natural stones to complement your home's colour scheme. Its waterproof properties ensure longevity, minimising repair and maintenance costs. And Geostone® isn't limited to just the floor. Our polished concrete can even be shaped and styled to create a custom benchtop for your kitchen, laundry or bathroom.

Living areas and staircases.

Whether you're entertaining guests or needing a family-friendly space, Geostone® is designed to stand the test of time. Its durability and functionality make it the perfect flooring solution for high traffic areas, with its allergy-friendly, skid and scratch-resistant qualities making it easy to clean.

Right place, right time.

Geostone® is backed by Holcim
– the global leader in concrete solutions.

With a network of over 160 concrete plants, 32 display centres nationally and more than 40 quarries located throughout Australia, Geostone® provides the stability and certainty needed to get the job done. We also have display centres where you can view and feel the textures of our decorative concrete range in person. Talk to one of our local representatives about your product needs and availability.

Disclaimer: Geostone® is created from naturally occurring stone, aggregates and other materials. Variations of appearance, consistency, colour, shape and texture of such materials, and therefore the final Geostone® product, may occur. The base products which make up the background 'matrix' behind Geostone®, are also subject to the same levels of variation. These variations can be significant, especially when pouring over extended periods of time on the same house or project. Handling, placement and finishing techniques also play a part in variation of consistency, appearance, texture and quality as do weather conditions and the addition of water.

Photographs and samples in this brochure are indicative only of the finished product and no guarantee of the colour, texture or finish is given or implied for the same reasons. Apart from naturally occurring factors, there can be differences between photographs, samples, displays and the actual product.

While we recommend visiting one of our display centres and viewing samples before making your final colour selection, please note that variations from such samples may occur for the above reasons. Holcim does not prepare the site or install or finish any product.
