

Specialty Venetian Blinds

Horiso Specialty Venetian Blinds (SVB)

High performance, technically engineered venetian blind systems for external and/or internal use. Horiso SVB systems are manufactured at our facility in Sydney using high quality materials and components. Systems can be raised, lowered and tilted by manual operation, motorised control or integrated automated control. Horiso SVBs control, maintain and optimise interior conditions.

- Aluminium or timber slats
- Manual, motorised or automated control
- 80mm, 100mm and 150mm slat sizes available
- Solid or perforated slat options
- Indoor or outdoor use

SUNSHIELD
UNIQUE LOUVRES

Rack Arm Systems

Horiso Rack Arm Systems

Horiso is the Australian distributor of Sunshield® Unique Louvres, the world leader in operable Rack Arm Shading Systems. Designed specifically for solar shading on sloped and shaped glazed areas, the tiltable non-retractable shading system is suitable for internal or external use in a range of slat sizes.

Systems can be fixed, crank operated, motorised or automated.

- Aluminium or timber slats
- Simple to retrofit
- Installation on various glazing shapes
- Wide variety of control options

Guthrie Douglas

Tensioned Shading Systems

Horiso Shading Tension Systems

Horiso is a distributor of technical shading tension systems by Guthrie Douglas, the global leader in automated retractable shading systems for extraordinary spaces. The fabric-based motorised TESS™ systems are perfect for installation on horizontal and sloped glazing and suitable for both internal and

external use including systems that will deploy in any direction.

- Wide range of fabric options
- Simple to retrofit
- Any shape or angle
- Wide variety of control options
