ASKIN | Limitless

LIMITLESS SOLUTIONS TO ENHANCE CREATIVITY AND IMAGINATION

ASKIN Limitless offers a vast array of façade options, including - Vivid, Equitone, WoodForm, Trespä, Swiss Pearl, Terreal, Alucobond and many more.

The ASKIN Limitless façade range can be installed in various ways - Traditional 'Top Hat' systems, Direct Fix, Timber Battens, or a fully BCA compliant engineered aluminium façade support system.

ASKIN Limitless solution for new-build or retro-fit applications, give a new dimension to the external appearance of a building and also enhance the longevity of the buildings performance.

Using ASKIN Limitless in conjunction with the ASKIN XFLAM high performance panels, delivers lower running costs, improved thermal performance, reduced HVAC requirements and the reduction of power, energy and CO₂ emissions.

ASKIN lead the way with a full range of high Performance Panels systems, supported with unsurpassed innovation and technology to deliver unbeatable benefits. This Performance is fully reinforced with a 'cradle to cradle' philosophy, delivering a whole of life solution.

Interiors

A complete range of temperature control facilities incl. distribution centres, food processing and clean rooms.

Exteriors

Insulated, air-tight constructions, performance proven for decades, limited only by a designers imagination.

Roofing

Combining ceiling and roof provides a fast to install, weather tight, thermally efficient roof system.

Doors

Innovative energy saving insulated doors manufactured to maximise efficiency in your built environment.

Solutions

A practical approach to provide a total solution inclusive of windows, ancillaries, soffits, hoarding, etc.

Vivid

High End Architectural Flat and Profiled panel with a concealed fixing for a seamless impression.

Limitless

Unlimited options for face finishing of insulated Facades. Designed for Architects built for Installers.

Specification

Verifying standards, codes and improving construction quality with unequivocal details to satisfy design, product and service.

Design & Drafting

From conceptual design, development and documentation, through to as-built construction drawings.

Engineering

Utilizing empirical evidence and practical knowledge to value engineer solutions to functional building requirements.

Logistics

With sites across Australasia, and 50 years of local knowledge, transports reliability in service and delivery.

Installation

Stringent building codes & standards require certified construction & project management to ensure ultimate accountability.

Maintenance

The fundamental steps for exceptional long term performance and providing a whole of life solution.

Sustainability

ASKIN's best in class environmental credentials and processes use less and provide more.
