G-SPEAK
3G GSM mobile phone switching device

The G-SPEAK gives you complete control at your fingertips.

With ability to switch devices on and off and be sent SMS alerts all via your phone!

It also lets you look after your home or business from just about anywhere.

G-SPEAK features include:

- The G-SPEAK can be configured to monitor two separate electrical devices such as your home alarm or automatic gate.

- Up to 500 different users can be programed making it perfect for either commercial and industrial applications.

- Password protection means that no one else can control your G-SPEAK . Passwords can be changed as often as necessary so your security is never compromised.

- The G-SPEAK can be set up via the G-Web online user interface or by SMS on your mobile phone.

Devices that can be monitored:
- House alarm: *Activated*
- Electric fence: *Alarm triggered*
- Mains power: *On / Off*
- Borehole pump status: *Running / Off*
- Entrance gate status: *Open pedestrian*

Devices that can be switched on/off
- Automatic gates
- Appliances
- Air conditioners
- Lighting systems
- Irrigation
- Alarm systems
