

# DT11 Casement & Awning Window Lock

## Sterling Series Window Lock Range

The DT11 is a non-handed key lockable sash lock suitable for use on both casement and awning timber windows.

Key locking and removable cylinder housing allows the insect screen to be removed for cleaning purposes without the use of tools.

### Features

- In addition to key locking, this product can be used individually or in multiples to improve window performance.
- Key number 92611 compliments other Sterling Series window hardware. Includes DT1 Double Hung Lock, DT2 sash lifts, DT3 keyed casement lock & DT4 Sliding Window Lock.
- Compliments casement and awning windows operated by arm winder or chain driven products (e.g. DS177 Chainwinder).
- Dimensions complimentary to existing latches.
- Tested to provide secure fixing in excess of 1000 newtons of negative pressure.

**SUITABLE FOR  
TIMBER**
