

academy

This superbly engineered seating system, with an exceptional track record, provides a new level in comfort for a lecture theatre or conference venue.

The seat cushion and back squab are cold moulded urethane foam over curved ply inners, bolt fixed to a robotically welded steel support system. The seat has a quiet gravity tilt action, pivoting on zero maintenance, self lubricating nylon bearings.

The seat and back are upholstered in standard Effuzi fabrics, or in the fabric of choice to blend with your decor and ambience. The outer back and underside of the seat are enclosed by way of an injection moulded ABS pan. This protects the tilting mechanism and provides a non wear area for fabric edges and backs.

The 'Academy' system can be either tread or riser mounted in a variety of formats. Curved rows and infinitely variable seat spacing can be accommodated due to the unique single leg design.

The 'Academy' is a must for lecture or conference venues requiring a robust durable seating system, providing excellent levels of comfort at an economical cost.

academy

academy options

- fabric selection
- powder coating colours
- arms
- riser mounting
- desk options
- curved rows
