

The sprayable stone-like finish for renovations or new construction

STONETOUCH is the perfect solution for commercial and residential exteriors and interiors. Whether you are into restorations, new construction, commercial or residential **STONETOUCH** offers a solution for every job.

Use it in place of stucco, paint or stone - it's 100% weather-proof and looks great. It melds around complex curves and architectural details to yield an attractive stone surface.

STONETOUCH gives you creative freedom to apply a stone-like finish to virtually any building project - from foundations to architectural details - it's equally suitable for coating concrete garage walls or ornate balconies.

Mouldings and other architectural details come alive with **STONETOUCH**. Foam, concrete, wood - all can have a spectacular stone-like finish in minutes.

Architectural Spray Coating System™ »

StoneTouch is tough as well as beautiful

STONE TOUCH finishes have been formulated to match natural granite in their look and texture. It provides a high-performance coating that withstands structural movement, climate variations, UV exposure and doesn't crack, peel, or crumble. No actual stone is used in the sustainable manufacturing process.

StoneTouch is fast to apply

STONE TOUCH is applied quickly with specified spray equipment and settings. Applying **STONE TOUCH** is about ten times faster than installing natural stone and is even easier to apply than painting for the trained applicator.

By spraying instead of trowelling, large areas can be covered faster, saving time and labour costs. The minimal overspray means savings on cleanup time as well.

The Single Component Formula is the secret for achieving one of the five stunning granite colours and provide a unique finish time after time, batch after batch.

Five attractive StoneTouch colours to choose from ...

GT-005 KASHMIR GOLD

GT-006 SIRA GRAY

GT-009 RED RUBY

GT-010 BLACK PEARL

GT-012 RAJA PINK
