A different way to do battens.

Introducing Laminex Architectural Panels – a new range of prefinished wall and ceiling panels. Featuring a selection of popular Laminex woodgrain décor in three linear profiles, the range will add textural interest to any space.

Laminex Architectural Panels have been created using a selection of realistic woodgrain décors from the Laminex Colour Collection, ensuring seamless integration throughout your next project. Whether you're looking for distinctive timber contrasts or perfect woodgrain harmony, this new system provides cohesiveness and unity, tying walls and ceilings and joinery together to create considered spaces full of architectural detail.

Laminex Architectural Panels are designed and made in Australia.

The range of Wall Panels are Global GreenTag certified.

Walls.

This clever system provides a new way to install timber battens on interior walls allowing for creative freedom and seamless décor and colour integration. Fast and efficient installation make them the ideal choice for whole and feature walls. Laminex Architectural Wall Panels are the ideal material to develop your next project from concept to completion.

Seamless design and colour integration

Laminex Architectural Panels have been created using a selection of realistic woodgrain décors from the Laminex Colour Collection, ensuring seamless integration throughout your next project.

Smarter, faster installation

Using our InvisiLock™ joining system, our unique wall panels can be installed 3 x faster than individual battens, providing a cost-effective solution for commercial and residential interiors using only standard tools and fixings.

Designed to last

Our unique InvisiLock™ wall panel joining system features an invisible fixing method that ensures a seamless and continuous wall appearance, even preventing bows and gaps over the period of its lifetime. This is a durable walling solution made from decorated MDF that is scratch, stain and impact resistant, thanks to our unique clear coat system. It's designed to withstand the wear and tear of commercial environments, whilst maintaining a seamless, continuous wall look over time.

The InvisiLock™ system

The InvisiLock™ joining system is exclusive to the Laminex Architectural Wall Panel range, allowing each panel to be connected seamlessly, providing a bow and gap-free finish and minimising installation time.

Fixing system shown in **Sublime Teak VGroove 100** with **Natural Shadowline.**

Wall Panels are **Raw Birchply VGroove100** with **Black Shadowline**. Lockers in **Platypus Multipurpose Compact**.

Ceiling Panels are **Classic Oak VGroove100** with **Black Shadowline**.
Joinery in **Ghostgum** and **Classic Oak**, benchtop and splashback in **Marmo Grigio TrueScale™**.

Ceilings.

This collection of tiles and panels is ideal for both retrofit and new ceiling systems, offering direct fix or suspended ceiling options suitable for a range of projects. The large-format panels feature unique, removable tongue-and-groove joints, enabling a variety of panel layouts for versatile design possibilities. With an array of décors and profiles that match Laminex Architectural Wall Panels, the design possibilities for fit-outs are virtually endless.

Design flexibility

A premium ceiling solution offering creative freedom: from how the panels are fixed to how the joins are displayed. These systems are designed to seamlessly retrofit into existing structures, making them highly adaptable for various design needs.

Integration for a complete solution

The range is designed to provide solutions for a seamless integration between walls, ceilings and flat cabinetry where required. Please note panels are not suitable for cabinetry doors.

Designed for standard systems

A design-led solution to elevate your next project in a room with a suspended grid system. This flexible solution will transform commercial ceilings quickly and easily providing installation options for:

- Drop in on suspension systems that uses a ceiling hanger or suspended rod
- Direct fix to suspended systems fixated to primary rail or top cross rail
- Direct fix to battens or furring channels

Designed to work with Laminex Architectural Wall Panels.

Tongue & Groove fixing system shown in **Raw Birchply Batten 40** with **Black Shadowline.**

Navigating the range.

The range features six Laminex Woodgrain décors each available in three profile options, designed to suit a wide range of design styles and projects. The six décors are available with a Black Shadowline. Laminex Sublime Teak is also available with a Natural Shadowline.
