Introducing FlexiSign by CIVIQ: the modular signage solution ideal for public wayfinding and community information displays

The FlexiSign is our unique modular signage system developed for use across a broad range of indoor and outdoor applications.

Available in eight unique profiles, the product can be configured in a range of signage formats, including freestanding totem or pylon, horizontal stand, cantilevered blade, wall-mounted, suspended, pole-mounted, as well as portable options.

The system is fabricated with structural marine-grade aluminium

and stainless steel modular componentry.

FlexiSign graphics panels are interchangeable for easy replacement, minimising both cost and time spent on signage maintenance

The freestanding totem variants are also available with an optional in-built polycarbonate interchangeable poster display case for printed public messages and timetables.

The FlexiSign system is particularly popular with the public transport sector, and has been specified by authorities across Australia for decades – with proven performance. It is suited to all types of public spaces, such as outdoor campuses and precincts, parks and waterfronts, schools, universities, sports and camping grounds, bush walking sites, as well as indoor settings.

Specified by authorities across Australia for over 25 years

What our past clients have said

“CIVIQ was engaged by Bankstown City Council for the supply and installation of various sizes and types of FlexiSigns, including bus stop plinths for the Bankstown CBD Bus Interchange.

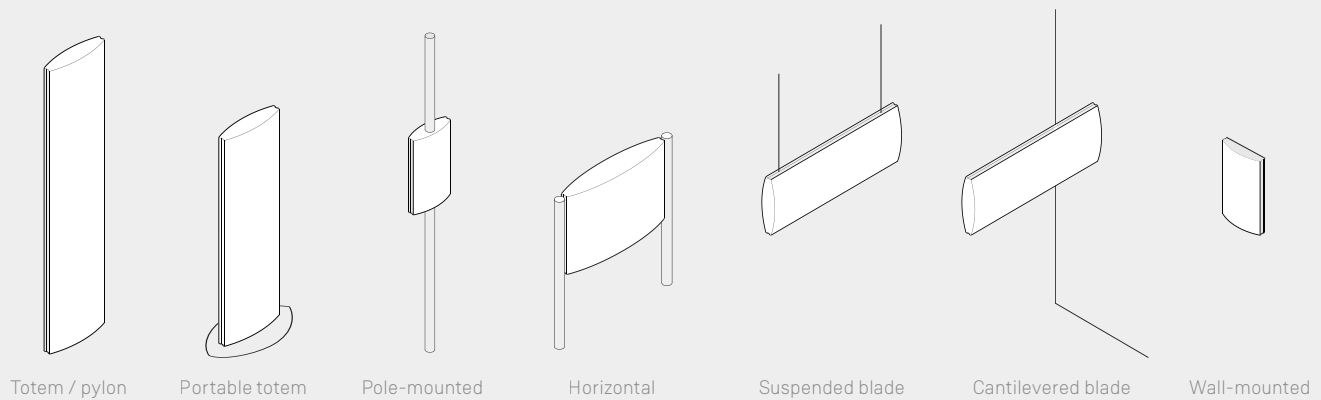

The delivery of the signs was timely, met the project deadlines and the installation was undertaken to a high and professional standard”

Ray Saleam, Team Leader Capital Works
Bankstown City Council

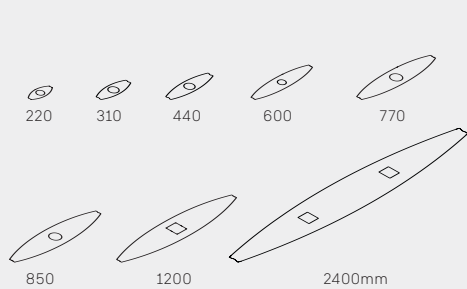

“The performance of the FlexiSign product is very good in its ability to meet its ‘fitness for purpose’ with no or minimal maintenance requirements ... and is backed up by excellent after sales support”

Grant Cooper, Project Manager (Signage)
Public Transport Victoria

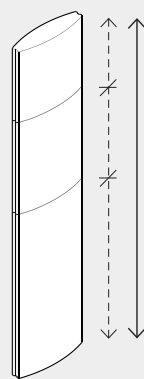

How the FlexiSign system works

1 Select a signage format

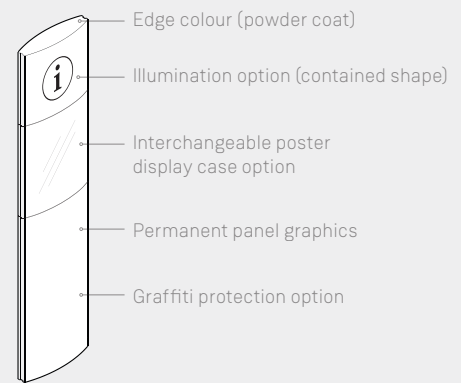

2 Choose a profile

3 Define the length

+ quantity of modules
+ heights

4 Customise the specification

CIVIQ's Design, Fabrication & Installation services

CREATE A CUSTOM DESIGNED SOLUTION

The CIVIQ design team has extensive experience in designing and managing wayfinding and signage projects - from scoping, to conceptual design, finished artwork, printing, manufacture, installation, after-service maintenance and technical support.

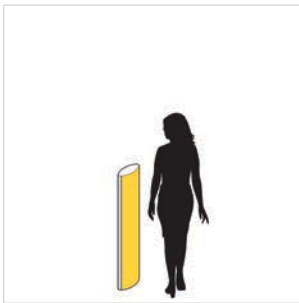

Please contact our team at design@civiq.com.au or phone **1300 600 300** for more information.

SUPPLY YOUR OWN ARTWORK

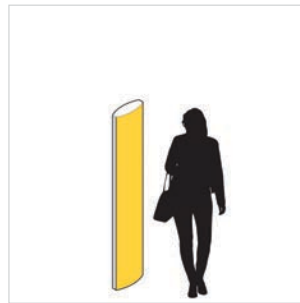

We regularly work with Wayfinding Design Studios, Councils, Schools and Business Communications Departments who supply us with their signage artwork for manufacture and installation.

The CIVIQ team can provide 1:1 scale signage panel graphic design templates as well as technical support throughout the process.
