Keyless Digital Deadlatch

- Unlock with pin or key card
- Program multiple user codes

More Information

For more than seven decades Lockwood has been securing homes in Australia. Today Lockwood is proud to launch the future of keyless locking. The 001Touch™ combines a stylish digital touch screen keypad with the security of the iconic Lockwood 001® Deadlatch. The simple convenience of using a pin code means you never have to carry keys again!

Illuminated touchscreen keypad

The touch screen keypad has no mechanical buttons which means no trace of your secret pin code.

Pin code or key card

Choose the convenience of a pin code or key card. One master pin code will manage up to twenty user pin codes. Up to 20 key cards can also be programmed.

Cryptic code function

Prevent others from identifying your pin code during access. The cryptic code function confuses the onlooker but at the same time allows you to still gain entry.

Secure mode

Secure mode gives the option to lock the 001Touch™ internally with a key. This secures the door on both sides with the ability to unlock the door with a pin code or key card externally.

User code that expires

A temporary code can be programmed to last from three hours to two weeks. This is ideal when a tradesman needs access for a few hours or when a neighbour is house sitting.

Visual guide for programming

For added convenience, an illuminated guide will assist in the programming of key features.

Low power consumption

Four standard AA batteries will unlock a door up to 10,000 times. A warning light will appear when the battery level reaches less than 30%.

Battery check function

The battery level can be checked without removing the batteries. A simple sequence reveals the battery level between 30% - 100%.

Smart memory

The settings, codes and key cards will remain programmed in the lock in the event the batteries are depleted.

Emergency battery connection

In the event the battery goes flat, two battery contact points will fit a standard 9V battery. A temporary charge will allow entry with the pin or key card.

Product Details

Key Pad Case	High purity zinc alloy
Battery Cover	High quality ABS plastic
Backset	60mm
Latch	Stainless steel 18mm projection
Door Thickness	32mm to 50mm
Finish	Chrome Plate

Retrofitable
Replace your existing 001® Deadlatch.

Deadlatch Bolt
Stainless steel 18mm projection.

Inside

Outside

Keyless Digital Deadbolt

- Touch screen PIN code access
- Program multiple user codes

More Information

The Lockwood Keyless Digital Deadbolt offers you flexibility with the use of a master pin code, 20 user codes and a visitor code that can be valid for up to two weeks. It also has a weather resistant keypad, low battery warning, key override for emergencies and many more features for your safety and convenience.

Ideal for use on new doors or as a replacement on an existing door lock on your home, the Keyless Digital Deadbolt is also suitable for internal and light commercial doors such as storerooms and shop fronts.

Illuminated touch screen keypad

The touch screen keypad has no mechanical buttons which means no trace of your secret pin code.

Pin code allowance

One master pin code will manage up to twenty user pin codes.

Cryptic code function

Prevent others from identifying your pin code during access. The cryptic code function confuses the onlooker but at the same time allows you to still gain entry.

Visual guide for programming

For added convenience, an illuminated guide will assist in the programming of your lock.

Low battery warning

When battery power is below 30%, the low battery icon will begin flashing. If battery power is completely lost, use the key override.

Emergency key override

In the event your battery goes flat you have a key override that will prevent you from being locked out. Remember to always keep your keys in a safe and convenient place.

User code that expires

You have the ability to program a code that may last from 3 hours to 2 weeks. This is ideal when a tradesman requires access to your house for a few hours or when your neighbour is looking after your home.

Code lockout settings

Privacy mode allows you to deactivate the keypad from the inside providing a secure environment from others who may have pin code access.

By using your master pin, you can also restrict all user pin access.

Q-Key

Code Handle Keyless Lockset

- Lever handle with integrated code lock
- Program multiple user codes

Lockwood's innovative door handle with integrated electronic security, offers simple and effective keyless locking, without compromising aesthetics.

Designed to enable conveniently controlled access to a door with easy installation. Code Handle is ideal for offices, store rooms or a study at home.
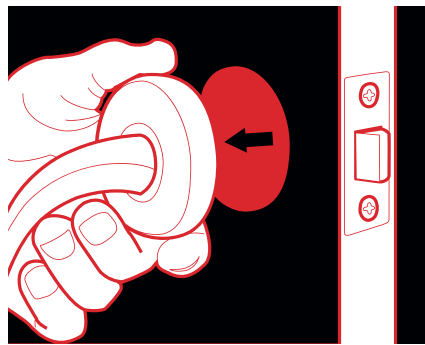

The Code Handle provides flexible locking options for doors that need to be always locked or alternatively can be left open to provide free access during the day and locked at night. The Code Handle is an electronic product that is not weather rated, so use should be limited to appropriate environments.

Key Features

- Lever handle with integrated code lock
- Program up to 9 User codes, 4-6 digits in length
- Keypad access control lever
- Supplied with Lockwood 530 60mm latch
- Easy to install
- Ideal for retrofit installations
- Programmable administration code for setting lock operation and user programing
- Manual or automatic locking
- Passage mode
- Code lockout after 5 incorrect attempts
- Durable stainless steel handles
- Left and right handed versions

Retrofitable
Fits majority of doors with a 54mm hole. Designed to provide convenient keyless access to a door by replacing the existing door handle.

Approximately 30,000 operations before replacement.

Mechanical Digital Locks

530DX Keyless Entrance Set

The Lockwood Digital DX Locksets provide a mechanical method of keyless entry.

For extra security when under forced attack, the inbuilt clutching mechanism allows the outside knob to rotate without operating or damaging the lock.

The factory set 5 digit code is easily changed to any 4, 5 or 6 digit code using the code changing kit provided with each lock.

Lockwood Digital DX Locksets are designed to control access into commercial areas, especially when frequent combination changes are needed to maintain security.

As the digital lockset utilizes mechanical operation, electrical wiring is not required.

530 Digital DX Locks suit right or left hand doors opening inward and outward.

Outside function

Press the C button, enter the correct code, then turn the knob to unlock the door. Upon releasing the turn knob the code is automatically cancelled.

Inside function

Opened by knob/lever at all times.

Inside   Outside

Product Details

Door Thickness	32mm to 45mm.
Latch	Brass 13mm projection deadlatch
Backset	-60mm -70mm and 127mm latches available separately on application
Finish	Satin Chrome Brushed, Polished Brass
Options	Also available in double keypad version, which provides a keypad on each side of the door.

Fire Rated
The Lockwood 530 Digital DX Entrance set has been successfully tested up to 2 hours on fire door assemblies (depending on type of doorset) in accordance with Australian Standard AS1905.1:2005, Fire Resistant Doorsets.

002DX Keyless Deadlatch

The Lockwood Digital DX Locksets provide a mechanical method of keyless entry and are designed to control access into commercial areas, especially when frequent combination changes are needed to maintain security.

For extra security when under forced attack, the inbuilt clutching mechanism allows the outside knob to rotate without operating or damaging the lock.

The factory set 5 digit code is easily changed to any 4, 5 or 6 digit code using the code changing kit provided with each lock.

As the digital lockset utilizes mechanical operation, electrical wiring is not required.

002 Digital DX Locks suit right or left hand doors opening inwards.

Outside function

Press the C button, enter the correct code, then turn the knob to unlock the door. Upon releasing the turn knob the code is automatically cancelled.

Inside function

Opened by knob/lever at all times.

Hold-back function

Bolt hold-back function activated by rotating inside knob/lever clockwise, past 90 degrees.
