

afs rediwall® Permanent formwork walling system for above and below-ground application

10x better than blockwork | more than **2x** faster than blockwork

Here's why...

	<i>Blockwork</i>
Load bearing Has greater load bearing capacity than standard or high strength blockwork	X
Versatile Comprehensive range of profile widths: 110mm, 156mm, 200mm, 256mm	X
Monolithic Core-filled with concrete, clean and even finish	X
Time saving Blockwork is over 2x slower than afs rediwall®, see why at afsformwork.com.au/video-gallery	X
Easier materials handling Lightweight PVC panels are easily positioned by hand	X
More and less Range of profiles to maximise floor space, minimise concrete	X
Easy to use Components simply snap* or slide together for hassle-free installation	X
Quality finish High quality, low finish maintenance	X
AS3600 compliant Certified for resistance to fire and water penetration	✓
Cut-to-size Supplied as you need them to avoid wastage—keeping sites clean	X
Fewer trades needed Formworkers can build decks/walls & smaller workforce helps reduce WHS issues	X

rediwall® advantages

-  Above and below ground versatility
-  Ease of materials handling
-  Speed of construction and earlier handovers
-  Lightweight, durable system
-  Load bearing structure
-  AS3600 compliant
-  High quality, low maintenance, gloss finish
-  Water resistant
-  Innovative Snap-In™ or slide-in for rapid installation
-  Patented Ezy-Fit™ corner cover for easy placement & inspection of reinforcement
-  Fire performance
-  Significant waste reduction
