Company Profile

[www.alliedfinishes.com](http://www.alliedfinishes.com)

## Our Mission

As flooring specialists in the food and beverage industry, our mission is to **reduce production downtime and deliver uptime** by providing solutions that are durable, safe, compliant to Australian legislation, and delivered as fast as possible.

## About Us

Allied Finishes is a family business that has a history in coatings dating back to the 1970s.

With a background in formulating and manufacturing premium two-pack coatings, we began as flooring installers to all industries. However in the last two decades we recognised the special challenges and issues faced by the food & beverage industry in regards to flooring & drainage. We saw the need for a 'specialist' to analyse these issues and develop solutions to withstand food acid, chemicals (including cleaners and concentrates etc), extreme temperatures and corrosive liquids. In addition to this, these flooring solutions had to be non-slip, easy-to clean, sloped to drains to prevent pooling, WHS compliant and also aesthetically pleasing.

With our experienced team of installers, we seek to help our clients to comply with WHS legislation & Australian Food Safety Standards, as well as providing advice & industry knowledge to guide them in maintaining their floors.

We want our customers to be 100% satisfied with their flooring and drainage.

## Fast

Understanding the pressure of shutdowns in the food industry, our technical team have developed solutions that are fast drying to efficiently reduce downtime. In a high pressure situation, our customers know that they can rely on us to fix their problems - often with less than a week's notice.

## High Quality

Everyone wants a good quality service or product, but do they actually get it? Seeing too many flooring disasters that were initiated by unprofessional work, we strive to deliver top quality products & services that are cost effective long-term.

## Experienced

Our teams are highly trained in floor coatings and share our mission of delivering durable, safe floors in a timely manner. On every project we assign a senior project manager to maintain communication with the client, and ensure the project is completed to the client's specifications.
