ForestOne

Forest**One** is an innovative force in the timber and decorative solutions industries. They're Australia's largest independent distributor of plywood, timber, laminate and decorative surface materials.

Forest**One** is driven by a passion for innovation, responsible sourcing, and attentive customer service. More than a trusted building supplier, Forest**One** is focused on offering building solutions to customers.

Their customers are at the heart of everything they do and their staff take pride in their ability to serve them.

Currently located in all major Australian capital cities including Melbourne, Sydney, Brisbane, Perth and Adelaide, as well as Cairns and Townsville, their presence extends internationally with offices in Singapore, Kuala Lumpur, London and Moscow.

History

Over 140 years ago, the Gunnersen family began a commodity building supplies company. That company has grown to be a major player in the building industry, focused on excellent sourcing and supplying commodity and decorative products nationally.

On 1 July 2019, the company changed ownership and embarked on a new chapter as a blending of four companies; Gunnersen, Australian Forest Products, Crown Timber, and Forest**One** International together as Forest**One**.

The Next Chapter

The company has undergone more than a name change, there's a new business ethos. More than building supplies, Forest**One** is offering building solutions.

Forest**One** steps into the future with some of the most innovative and premium quality products in the market, always sourced ethically and with the needs of their customers at the core.

The EGGER Decorative Collection

The EGGER Decorative Collection App

Download the EGGER Decorative
Collection App now.

Get ready for an enhanced experience

1. Launch the EGGER Decorative Collection App on your smartphone
2. Use the scanning function to capture any decor code in this brochure.
3. Get access to
 - availability information
 - your selected decor as a full board and in 3D
 - quick sample ordering
 - decor combinations

This brochure features the Forest**One** collection with products, decors, textures, and trends. It works as a link to all the content of the entire EGGER Decorative Collection App and additional information at www.egger.com.

With the EGGER app, the entire collection is always within reach. The app helps with quick decision making and gives you easy access to what you

need to implement your great ideas. For even more comprehensive customer service, samples are available in various formats, which you can order quickly and easily via the app.

» More information about the collection on www.egger.com/decorative-collection

EGGER Virtual Design Studio Online

The EGGER Virtual Design Studio is an online tool which supports your trend-oriented design consulting. Use our Virtual Design Studio to help your customers make a decision. At the touch of a button, you can display the entire EGGER Decorative Collection as well as all the latest

flooring decors in different room settings and use the comparison mode to test two designs in one room at the same time. All functions can be integrated easily and free of charge into your website.

Decors and products not stocked in Australia are available upon request. Minimum order quantities and lead times apply.

The environmental cycle – Why sustainability is more than just a word for us.

Wood-based materials production and further processing

To continually improve our environmental performance in the production process, we are opting for internationally certified energy and environmental management systems in accordance with ISO 50001, ISO 14001 and EMAS.

Use of sawmill by-products

We prefer to buy by-products from regional and certified sawmills. By using by-products we save natural resources.

Sustainable forestry

We support the sustainable development goals of the UN. With SDG 15, we are committed to the protection and restoration of terrestrial ecosystems and to promoting the sustainable management of forests. Our wood comes from 100% verified legal and controlled sources according to ISO 38200. We buy roundwood preferably from FSC®, PEFC or SFI certified forests in the purchasing region.

Consumer / Product Environmental Performance Assessments

We provide full transparency with Environmental Product Declarations (EPDs). They provide professionals with important information on environmental and health aspects, and are also available to interested end-users – for each of our base products.

Recycling

We recycle waste wood in our production of wood-based materials. It comes from disposed goods such as furniture, pallets or packaging material. In this way we conserve fresh resources and extend the effect of CO₂ storage.

Renewable energy

We convert heat into green electricity in our own biomass power plants. The biomass and wood residues can no longer be used as materials in production.

The mark of responsible forestry

Promoting Sustainable Forest Management

Wood-based materials contribute to climate protection ...

... and you can now get an idea of how exactly they do it.

Because, for selected products in this brochure, we disclose information on their environmental performance:

Product structure:

Eurodekor melamine faced chipboard

-  **1** **CO₂ footprint*** **-13.8 kg CO₂ / m²**
-  **2** **87% material from renewable resources**
13% material from fossil resources
-  **3** **23% recycled material**
42% by-products from the sawmill industry and pre-consumer recycling wood
35% fresh resources
-  **4** **68% regional wood origin**
-  **5** **100% verified legal wood origin**
61% of that certified

More information on our sustainability indicators under www.egger.com/ecofacts

Status 2021. For current figures please visit our product pages www.egger.com/products-interior

Full transparency from us and no paperwork for you

Save time and effort on publicly tendered or sustainably certified projects when it comes to submitting the right documents. Information on environmental and health aspects is already available – thanks to “fully declared” EGGER products.

Find out more at www.egger.com/environment

1 CO₂ footprint*

Wood-based materials are climate-friendly. They bind more carbon dioxide than they emit during production.

2 Contribution to the bioeconomy**

Wood-based materials grow back. Unlike fossil raw materials, wood is a renewable resource.

3 Contribution to the circular economy**

We conserve natural resources. We act in cycles and make the best possible use of existing wood.

4 Wood proportion from the regional environment

We focus on short distance transportation. Our used roundwood is mainly procured regionally.

5 Wood proportion from verified and certified sources

We use wood from verified and certified sources. We are committed to sustainable forest management and control of our supply chains.

* externally verified calculation according to EN 15804, see EPD

** own calculation according to the rules of ISO 14021 for environmental supplier declarations, proportion by dry weight. The values are related to the average product structure and may deviate slightly depending on the thickness and selected coating

Decor match

You don't want to compromise on design and quality in your projects. And with our tried-and-tested decor and material combination you don't have to. All decors are available on classic melamine faced chipboard or MDF boards, Eurolight lightweight boards and as laminates. In addition, we offer you edging solutions that are perfectly matched to the decor and texture.

Scan decor codes on the following pages to get more information about product and decor availability in the app.

For detailed information on the mentioned product characteristics and their reference to standards, please refer to the technical data sheets in the download area on the respective product page.

Laminates

YOUR BENEFITS

- Resistant to abrasion, impact and scratches
- Hygienic and food-safe
- Wood reproductions offer a cost-effective alternative to solid wood and veneer
- Available in decors and textures which coordinate with other EGGER products
- Antibacterial surface properties in accordance with ISO 22196 (= JIS Z 2801)

Scan the decor code using the app.

The multi-layered construction of laminates and the materials used to this end ensure high levels of usability. Thanks to their postforming property, almost all laminates can be postformed. MED-certified laminates are available for use in shipbuilding.

» Find out more at www.egger.com/laminates

Product structure

2.03 kg CO₂ / m²

60% materials from renewable resources
40% materials from fossil resources

100% fresh resources

All our shown and mentioned decors are reproductions.

Eurodekor® melamine faced chipboard panels

YOUR BENEFITS

- Universally applicable
- Resistant to abrasion and scratches
- Lightfast
- Recyclable
- Ready for immediate use – no oiling, staining or other protective measures required
- Authentic-looking decors and surfaces
- Available in decors and textures which coordinate with other EGGER products
- Antimicrobial properties in accordance with ISO 18184:2019
- Antibacterial surface properties in accordance with ISO 22196 (= JIS Z 2801)
- F**** (0.3 mg) formaldehyde

Eurodekor melamine faced chipboards consist of raw chipboard that is covered on both sides with decorative paper. They are suitable for horizontal or vertical applications in furniture and interior design, such as fronts, shelves, wardrobes or wall cladding. We offer a contemporary, aesthetically sophisticated solution in proven EGGER quality as part of the decor and material combination. Depending on the application and stress, choose the right coreboard for your project.

Flammex (Flame-retardant products)

Schools, hospitals, hotels, shops and other public institutions have very high needs for fire protection. Our 18 mm Flammex Melamine Chipboard is a Group 1 fire-rated product, tested in accordance with AS 5637.1. Flammex products are highly functional without limiting design flexibility. The Flammex product range is available in: Eurodekor Melamine Faced Chipboard, Laminate and Black Core Compact Laminate. Each Flammex product range is available in a wide range of decors.

» For more information visit
www.egger.com/flammex

YOUR BENEFITS

- Realisation of projects with increased fire protection requirements
- Reduces smoke and drop formation in case of fire
- For your safety – regular checks by external testing institutes
- Tested to AS 5637.1 and AS/NZS 1530.3
- 18 mm Eurodekor Melamine Faced Chipboard – Group 1 certified
- Antibacterial surface property in accordance with ISO 22196 (= JIS Z 2801)
- Antimicrobial properties in accordance with ISO 18184:2019

In the app, filter decors for products with low flammability.

ABS edging

YOUR BENEFITS

- Available in matching decors and textures
- Optically and haptically matched to the respective board decor and texture
- Board material and edging from a single source saves time and effort
- Large selection of thicknesses and widths
- Food-safe
- Available from one roll

ABS edging is used to edge coated wood-based materials such as chipboard, MDF, HDF and lightweight boards. It offers the right finish for decorative coatings. Safety edges ABS are available in a wide range of widths and thicknesses. In terms of decor, texture and gloss level, they are matched to the EGGER decors and products.

H1345 ST32

ABS & PMMA accent edging

ABS and PMMA accent edging in the EGGER Decorative Collection showcases how the greatest possible effect can be achieved with little effort.

Furniture design is increasingly focused on combining a variety of materials. Accent edges in combination with uni colours or wood and material reproductions enable a variety of creative combinations.

» Find out more at
www.egger.com/edgings

YOUR BENEFITS

- Cost-efficient highlighting
- Realisation of trend designs
- Skilful accent setting
- Available from one roll
- Food-safe

ABS end-grain edging

The end-grain edging underlines the natural effect of the decors. It replicates the look of a log cut across its length with visible annual rings and, in combination with the matching long edge, creates a harmonious overall look.

» For more details see
www.egger.com/end-grain-edgings

YOUR BENEFITS

- Similar to nature's model
- Optically matched to the respective board decor
- Food-safe
- Available from one roll

Compact laminates

YOUR BENEFITS

- Resistant to abrasion, impact and scratches
- Moisture-resistant
- Hygienic
- Food-safe
- Resistant to many cleaning products and chemicals
- Antibacterial surface properties in accordance with ISO 22196 (= JIS Z 2801)

Compact laminates have an attractive design and excellent product properties. Their durability and moisture resistance make them the ideal material for interior applications with increased stress and special attention to hygiene and cleanliness. In addition to kitchens, bathrooms and sanitary rooms, this also includes clean rooms, hospitals or restaurants.

PerfectSense® Premium Matt lacquered boards

YOUR BENEFITS

- Thanks to their matt surface, they are bang on trend
- Anti-fingerprint property – particularly advantageous for dark decors
- Reduced cleaning effort
- Insensitive to conventional stains
- Resistant to many cleaning agents
- Resistant to heat and moisture
- Horizontal application possibilities (except kitchen worktops)
- Resistant to micro-scratches, such as those that can occur during cleaning
- Withstands even coarser scratches
- Supplied with protective film
- Optimised size
- Antibacterial surface properties in accordance with ISO 22196 (= JIS Z 2801)
- Food-safe

PerfectSense Premium Matt stands out from other furniture surfaces with its look and feel. The special anti-fingerprint property reduces fingerprints on the surface and minimises the cleaning effort. The on-trend, velvety-warm feel invites you to touch it and feel good.

» Find out more at
www.egger.com/perfectsense-matt

Product structure

PerfectSense® Premium Gloss lacquered boards

YOUR BENEFITS

PerfectSense Premium Gloss impresses with its very special gloss and depth. These properties were previously found in very expensive materials such as glass. The homogeneous MDF material as a coreboard has a positive effect on the properties of the high-end surface.

» Find out more at

www.egger.com/perfectsense-gloss

- Modern
- Mirror finish and depth
- Insensitive to conventional stains
- Resistant to many cleaning agents
- Resistant to heat and moisture
- Improved surface properties in terms of micro-scratch and scratch resistance
- Optimised size
- Antibacterial surface properties in accordance with ISO 22196 (= JIS Z 2801)
- Food-safe

U999 PG

A close-up photograph showing the edge of a thick, natural wood worktop resting on a white cabinet. The wood has a prominent grain and a few knots. Below the wood, a dark grey, textured inset is visible, which is set into a white cabinet. The lighting is soft, highlighting the textures of the wood and the smooth surface of the cabinet.

Worktops

New decors, new surfaces, new products, new thicknesses: The extended range of EGGER worktops opens the way for multiple possibilities. In addition to the well-known postformed worktops and Feelwood worktops with edging, there are two new options that can help you implement the current trend of thin work surfaces: The hard-wearing and super-matt PerfectSense Topmatt worktops with edging as well as the 12 mm thin, moisture-resistant compact worktops with various core colours.

 Find out more at
www.egger.com/worktops

Scan decor codes on the following pages to get more information about product and decor availability in the app.

For detailed information on the product properties mentioned and their reference to standards, please refer to the technical data sheets in the download area on the respective product page.

Postformed worktops

YOUR BENEFITS

- Resistant to abrasion, impact and scratches
- Hygienic and food-safe
- Resistant to stains
- Heat-resistant
- Matching decor splashback panels and perfectly coordinated wall end strips available
- Antibacterial surface properties in accordance with ISO 22196 (= JIS Z 2801)

Postformed worktops (mod. 300/3) are the established, classic worktops. Thanks to the seamless lamination of the surface they wrap around the curve and underneath the worktop. On the front longitudinal edge, the thin chip support edge ensures improved surface calm.

» Find out more at www.egger.com/postforming-worktops

Product structure

88% materials from renewable resources
12% materials from fossil resources

25% recycled material
41% by-products from the sawing industry and pre-consumer recycled wood
34% fresh resources

68% regional wood origin

100% verified legal wood origin
61% of which certified

Feelwood worktops with edging

Feelwood worktops with edging (mod. 100/1.5) achieve their authentic appearance and naturalness through the texture synchronised with the decor image. The front longitudinal edge is finished with a 1.5 mm thick ABS edge to match the decor. The additionally available end-grain edging for the transverse edging reinforces the natural impression of the decors and creates an overall appearance that can hardly be distinguished from solid wood. The result is a high-quality worktop with clear lines that also offers a modern look.

» Find out more at

www.egger.com/feelwood-worktops

Product structure

YOUR BENEFITS

- Very natural looking synchronised pore surface
- Resistant to abrasion, impact and scratches
- Hygienic and food-safe
