- Headboxes to suit architecture
- Powder coat colours to suit
- Over 30 fabric colours available

Helioscreen® offers a wide range of external sun control systems to complement every external façade.

External Screens are designed to take the toughest of treatments by reducing the sun's penetration and absorbing the heat.

Designed to control the entry of natural light, heat and sun radiation from the outside. External Screens allow you to extend outdoor living areas while maximising the advantages of glass and view from the inside.

Unaffected by extreme temperature changes, External Screens operate using discreet stainless steel side cables or sleek aluminium side channels, powder coated to suit any exterior.

Helioscreen's external fabrics, Helio86, Helio93 and Helioshade 100 come in a wide range of colour ways and are anti-static for easy cleaning.

External Screens can be manually operated or motorised by SOMFY and come with quality and performance warranties.

HELIOSCREEN'S INDOOR AND OUTDOOR RANGE

Includes: Roller blinds, Roman blinds, Panel glides, Blackouts, External screens, Varioscreens, Awnings, External louvres and venetians.
