EXECUTIVE SUMMARY

Australian Disabled Access Consultants is an Access and Mobility Consultancy based in Sydney, Australia that provides building design services to government authorities, building designers and the construction industry.

Australian Disabled Access Consultants provides the following range of services to ensure that physical or community barriers that discriminate against people with disabilities and special needs are removed:

- Comprehensive access & mobility building design codes
- Technical support to Government Special Needs Advisory Committees
- Workshop seminars to Government & community groups
- Site planning & building design services for guideline compliance
- Access and mobility assessment reports for project design plans
- Certificates of compliance for access and mobility design guidelines
- Building inspection audits for access and mobility design code compliance
- Action Plans to prioritize necessary building works identified in building audits

Australian Disabled Access Consultants assists clients and building designers with Development Applications and Construction Certificate Applications, building audits for new projects, alterations and additions to existing premises and sites, and action plans for:

- Government (public and community buildings, infrastructure projects)
- Housing (national housing estates, villa homes, high rise apartment buildings, residential hotels, tourist resorts, road design within housing estates, housing for aged and people with special needs)
- Retail and commercial (shopping centres, commercial office buildings, banks and automatic teller machines, restaurants and outdoor eating areas, child care centres, entertainment venues, business centre road design, estate design)
- Industrial
- Hotels, clubs and night clubs
- Hospitals, medical clinics and medical centres
- Rehabilitation hospitals and clinics
- Schools, colleges and universities
- Car parking areas and parking stations
- Entertainment venues (theatres, cinemas, museums and entertainment venues)
- Sporting facilities and recreational projects
- Community centres, museums, cultural centres and facilities
- Public buildings and places
- Churches and prayer rooms
- Institutional projects
- Estate master planning

Australian Disabled Access Consultants was awarded by the UAE Minister for Social Affairs at the ACCESS Dubai 2007 Conference for assisting the UAE people with special needs and for working with the UAE Government for the successful activation of the UAE Disability Act.

BENEFITS OF OUR SERVICES

Australian Disabled Access Consultants provide access and mobility building design advisory and auditing services to ensure that:

- a) Equal access is provided within all building projects and existing buildings to remove physical barriers that discriminate against people with special needs to comply with Government Laws and access building design codes.
- b) Comply with Government and local access and mobility design codes.
- c) Comply with the equal access and mobility principles of the Disability Discrimination Act.
- d) Provide an access and mobility assessment report to certify code compliance to reduce government application assessment timelines.
- e) Comply with the Building Permit's access and mobility design requirements during the various stages of building construction work.
