- ✓ Large panels sizes with shaped and angled options
- ✓ A natural material from renewable resources
- ✓ Natural Timber or Reconstituted Veneer options
- ✓ Fast and easy to install
- ✓ Environmentally sustainable - FSC

Glenwood Community Centre, NSW

KEY-LENA PRODUCT SUMMARY

SOURCING AND SPECIFICATIONS

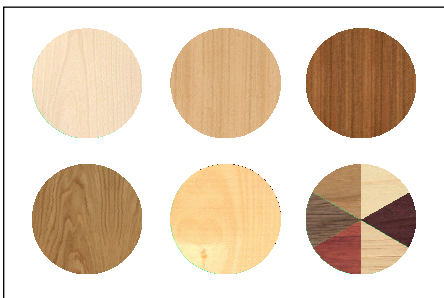

KEY-LENA is produced from ethically sourced quality materials from Australian suppliers to meet our clients' architectural requirements. **KEY-LENA** is a MDF substrate and is available in standard or moisture resistant substrate options.

SIZE AND THICKNESS

KEY-LENA offers a vast range of standard sheet sizes & thickness, based on client's requirements. These can be custom cut and shaped to suit your architectural specifications. Consult **KEYSTONE** for best options.

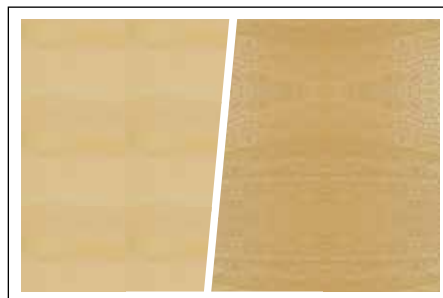

VISUAL FINISH AND DECORATIVE OPTIONS

KEY-LENA panels are excellent for feature panels and pre-finished options are popular. Can be used in their natural form with natural timber grain and textures, they can be also enhanced by applying a clear or stained finish to the face and edge of panels.

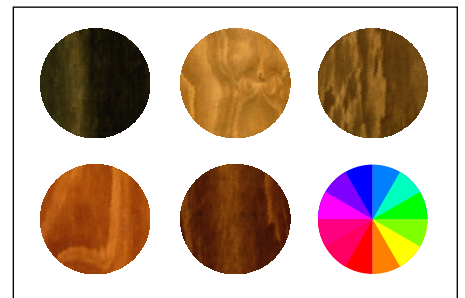

Veneers

Wide range of natural timber veneers and reconstituted are available

Clear

Finishes are available in the following levels - 10% Matt, 30% Satin

Stain

Coloured stains to your desired specification & whitewash finish available

OPTIONAL TREATMENTS

With certain finishes, we are able to add Key-Guard and Key-Shield options to suit your project.

Key-Shield

For Surfaces where Fire Safety is Key

Intumescent coatings expand and effectively extinguish the flow of heat to the treated surface, providing fire retardant protection to your timber and saving lives. Key-Shield is water and solvent-based clear intumescent coating system designed for use on interior timber wall and ceiling surfaces and is available in a matt or satin finish.

Key-Guard

For Surfaces where Hygiene is Key

Keystones's **KEY-GUARD** Coating incorporates Biomaster technology. Biomaster pioneered the use of silver-based antimicrobial additives and today is the recognised leader in antimicrobial technology.

Some treatments may not be possible on your style of finishing.

ACOUSTIC OPTIONS

Just like the visual customisations, numerous acoustic customisations are also available for **KEY-LENA**. Advanced compressed perforation techniques and various backing materials are utilised to optimise the sound performance to suit client requirements.

- ✓ Perforated and slotted panels are available in five standard patterns
- ✓ Acoustic Amplification using K100 acoustic backing

INSTALLATION OPTIONS

KEY-LENA panels are manufactured to be installed by a builder or nominated contractor. A vast benefit of **KEY-LENA** panels lies in the simplicity and ease of installation.

- ✓ Ceiling panels fixed by standard Key Lock Rondo system or similar
- ✓ Face fixed to furring channels, wall studs or ceiling Battens
- ✓ Wall panels can be hung on split battens
- ✓ Panels can be installed with express joints with as little as 10mm clearance
